AUTHOR INDEX

A

Abboud, Francois M., and **John W. Eckstein.** Vascular responses after alpha adrenergic receptor blockade. II. Responses of venous and arterial segments to adrenergic stimulation in the forelimb of dog 10

—, **Phillip G. Schmid**, and **John W. Eckstein.** Vascular responses after alpha adrenergic receptor blockade. I. Responses of capacitance and resistance vessels to norepinephrine in man 1

Admirand, William H., and **Donald M. Small.** The physicochemical basis of cholesterol gallstone formation in man 1043

Afolayan, A. See Luzzatto and Afolayan 1833

Ahrens, E. H., Jr. See Davignon, Simmonds, and Ahrens 127

Albert, Samuel. See Prasad, Tranchida, Konno, Berman, Albert, Sing, and Brewer 1415

Aledort, Louis M. See Weiss, Aledort, and Kochwa 2169

Alexander, Edward A., and **Norman G. Levinsky.** An extrarenal mechanism of potassium adaptation 740

Alper, Chester A., and **Richard P. Propp.** Genetic polymorphism of the third component of human complement (C'3) 2181

Altman, Michael. See Cross, Packer, Altman, Gee, Murdaugh, and Robin 2402

Alvsaker, J. O. Genetic studies in primary gout. Investigations on the plasma levels of the urate-binding α_1-α_2-globulin in individuals from two gouty kindreds 1254

Amorosi, Edward L. See Piomelli, Corash, Davenport, Miraglia, and Amorosi 940

Anderson, Joseph T. See Moore, Anderson, Taylor, Keys, and Frantz 1517

Anthonisen, N. R. See Heckscher, Bass, Oriol, Rose, Anthonisen, and Bates 1063

Appel, Stanley H. See Festoff and Appel 2752

Arquilla, Edward R., Henri Ooms, and **Karen Mercola.** Immunological and biological properties of iodoinsulin labeled with one or less atoms of iodine per molecule 474

Athens, J. W. See Bishop, Athens, Boggs, Warner, Cartwright, and Wintrobe 249

Atsmon, A. See Liberman, Sperling, Atsmon, Frank, Modan, and de Vries 2580

Aukland, Knut, and **Mats Wolgast.** Effect of hemorrhage and retransfusion on intrarenal distribution of blood flow in dogs 488

Avioli, Louis V., Stanley Birge, Sook Won Lee, and **Eduardo Slatopolsky.** The metabolic fate of vitamin D_3-^3H in chronic renal failure 2239

Aynedjian, Hagop. See Koch, Aynedjian, and Bank 1696

B

Baba, Nobuhisa. See Weissler, Kruger, Baba, Scarpelli, Leighton, and Gallimore 403

Baldia, Liveo B. See Sigel, Baldia, Brightman, Dunn, and Price 1231

Balint, John A., and **Emilios C. Kyriakides.** Studies of red cell stromal proteins in Tay-Sachs disease 1858

Balis, M. Earl. See Bradford, Krakoff, Leeper, and Balis 1325

Bank, Arthur. Hemoglobin synthesis in β-thalassemia: the properties of free α-chains 860

Bank, Norman. See Koch, Aynedjian, and Bank 1696

Barge, A. See Rapaport, Dausset, Legrand, Barge, Lawrence, and Converse 2206

Barlow, Mahlon H. See Strober, Wochner, Barlow, McFarlin, and Waldmann 1905

Barnett, Jack A. See Lehmann, Smith, Miller, Barnett, and Sanford 2541

Barry, Kevin G. See Scurry, Shear, and Barry 242

Bartter, Frederic C., Robert I. Henkin, and **George T. Bryan.** Aldosterone hypersecretion in "non-salt-losing" congenital adrenal hyperplasia 1742

—. See Davis, Burwell, Casper, and Bartter. 1425

Bass, H. See Heckscher, Bass, Oriol, Rose, Anthonisen, and Bates 1063

Bates, D. V. See Heckscher, Bass, Oriol, Rose, Anthonisen, and Bates 1063

—. See Holland, Milic-Emili, Macklem, and Bates 81

Battaglia, Frederick C., Giacomo Meschia, Edgar L. Makowski, and **Watson Bowes.** The effect of maternal oxygen inhalation upon fetal oxygenation 548

Baughan, Marjorie A. See Paglia, Valentine, Baughan, Miller, Reed, and McIntyre 1929

Behnke, Roy H. See Williams, Childress, Boyd, Higgs, and Behnke 1143

Beisel, William R. See Rapoport and Beisel 934

Beiser, G. David. See Epstein, Beiser, Stampfer, and Braunwald 139

Bennett, Cleaves M., Barry M. Brenner, and **Robert W. Berliner.** Micropuncture study of nephron function in the rhesus monkey 203

—. See Brenner, Bennett, and Berliner 1358

Berlin, Nathaniel I. See Wochner, Weissman, Waldmann, Houston, and Berlin 971

Berliner, Robert W. See Bennett, Brenner, and Berliner 203

—. See Brenner, Bennett, and Berliner 1358

—. See Howards, Davis, Knox, Wright, and Berliner 1561

Berman, Lawrence. See Prasad, Tranchida, Konno, Berman, Albert, Sing, and Brewer 1415

Bernstein, Gerald. See Oppenheimer, Bernstein, and Surks 1399

Berson, Solomon A., and **Rosalyn S. Yalow.** Radioimmunoassay of ACTH in plasma 2725

Bertles, John F., and **Thomas A. Borgese.** Disproportional synthesis of the adult duck's two hemoglobins during acute anemia 679

— and **Paul F. A. Milner.** Irreversibly sickled erythrocytes: a consequence of the heterogeneous distribution of hemoglobin types in sickle-cell anemia 1731

Bethune, John E., and **Randolph A. Turpin.** A study of urinary excretion of parathyroid hormone in man 1583

Bienenstock, John, and **Thomas B. Tomasi, Jr.** Secretory γA in normal urine 1162
Bingham, Margaret. See Evans, Turner, Bingham, and Woods 691
Birge, Stanley. See Avioli, Birge, Lee, and Slatopolsky 2239
Bishop, C. R., J. W. Athens, D. R. Boggs, H. R. Warner, G. E. Cartwright, and **M. M. Wintrobe.** Leukokinetic studies. XIII. A non-steady-state kinetic evaluation of the mechanism of cortisone-induced granulocytosis 249
Björkhem, Ingemar, Henry Danielsson, Kurt Einarsson, and **Gunnar Johansson.** Formation of bile acids in man: conversion of cholesterol into 5β-cholestane-3α,7α,12α-triol in liver homogenates 1573
Blackard, William G., and **Sylvia A. Heidingsfelder.** Adrenergic receptor control mechanism for growth hormone secretion 1407
Bladen, Howard A. See Lazarus, Daniels, Brown, Bladen, and Fullmer 2622
Blakemore, William S. See Rogers, DuBois, and Blakemore 2569
Bloom, Gail. See Field, Remer, Bloom, and Kriss 1553
Bluemle, Lewis W., Jr., and **Martin Goldberg.** Renal accumulation of salicylate and phenacetin: possible mechanisms in the nephropathy of analgesic abuse 2507
Bodel, Phyllis, and **Morris Dillard.** Studies on steroid fever. I. Production of leukocyte pyrogen in vitro by etiocholanolone 107
Boden, G., J. S. Soeldner, R. E. Gleason, and **A. Marble.** Elevated serum human growth hormone and decreased serum insulin in prediabetic males after intravenous tolbutamide and glucose 729
Boggs, D. R. See Bishop, Athens, Boggs, Warner, Cartwright, and Wintrobe 249

SUBJECT INDEX *

A

A variant
comparison of enzymic properties of, with four different types of human erythrocyte G-6-PD, and characterization of two new genetic variants, 1833

A⁻ variant
comparison of enzymic properties of, with four different types of human erythrocyte G-6-PD, and characterization of two new genetic variants, 1833

ABO blood groups
specific antigens of, effects of pretreatment with, 2206

Absorption
bile acids, from the large bowel, in man, 2070
L-methionine, from the human small intestine, 417

ABSTRACTS Proceedings of the 60th Annual Meeting of the American Society for Clinical Investigation, Inc., held in Atlantic City, N. J., 6 May 1968, 1466

Acetazolamide
phosphaturic effect of, in dogs, 983

Acid mucopolysaccharides
regional distribution of, in kidney, 2125
urinary excretion of, in exophthalmos, 2563

Acidification defect
renal, in patients with hereditary fructose intolerance, 1375

Acid-labile conjugate
of aldosterone, renal tubular handling of, 242

Acidosis
renal tubular, experimental renal acidification defect in patients with hereditary fructose intolerance, 1648

ACTH (adrenocorticotropin hormone)
plasma levels after "stress," in adrenal and other diseases, in man, 2725
radioimmunoassay for, in plasma, 2725

Adenine nucleotide
metabolism of, in human platelets, 2158

Adenine phosphoribosyltransferase deficiency
a previously undescribed genetic defect in man, 2281

Adenine-8-^{13}C
suppression of glycine-^{15}N incorporation into urinary uric acid by, in normal and gouty subjects, 1193

Adenosine infusion
effect of, on brain metabolism, in rats, 2133

Adenosine 3′,5′-monophosphate (cyclic AMP)
dibutyryl cyclic, effect of, on calcium and phosphate metabolism, 1843
effect of prostaglandin E_1 on the permeability response of isolated collecting tubule to, 1154
metabolism, in epithelial cells, in toad bladder, 2458

Adenosine triphosphatase (ATPase)
effect of diphenylhydantoin on synaptosome sodium-potassium-ATPase, 2752

Adenosine triphosphate (ATP)
utilization of, by uremic brain, in rats, 2133

Adipokinetic amines
fat-mobilizing action of amphetamine, 394

Adipose tissue
effects of nutrition on cellularity and metabolism of, in rat, 2091
effects of weight reduction on cell size and insulin sensitivity of, in carbohydrate intolerance of human obesity, 153
insulin sensitivity of, in carbohydrate intolerance of human obesity, 153
regulation of DNA synthesis in fat cells and stromal elements from, in rat, 2485

Adrenal cortical insufficiency
auditory detection and perception in normal man and in patients with, 1269

Adrenal hyperplasia
non-salt-losing congenital, aldosterone hypersecretion in, 1742

Adrenal steroids
cortical, effects of, on auditory detection and perception, 1269
cortical, effects of, on sodium excretion in uremic man, 521

Adrenaline
effects of, on catecholamine turnover in normo- and hypertensive man, 2359

Adrenergic blockade
alpha, vascular responses after, by norepinephrine, 1
effects of, on growth hormone, 1407

Adrenergic stimulation
responses of venous and arterial segments to, in forelimb of dog, 10

Aerobic respiration
and active sodium transport, effect of purified staphylococcal alpha toxin on, in isolated toad bladder, 1603

Agammaglobulinemia
in vitro behavior of agammaglobulinemic lymphocytes in, 836

Agglutinins
cold, chronic hemolytic anemia due to, and role of C′ in red cell destruction, 691

Aggregates
red cell, mechanical properties of, 1447

Airway conductance
effect of removal of bullae on, 2569

Albumin
human, mechanisms of maternofetal transfer of, and γG-globulin in mouse, 1204
measurement of rates of synthesis of, in control subjects and patients with gastrointestinal protein loss, 971
metabolism of, effect of nutritional state and dietary protein intake on, 1958
synthesis of, effects of short-term fast on, in the perfused liver, 2591

Aldosterone
hypersecretion, in non-salt-losing congenital adrenal hyperplasia, 1742
metabolism of, during pregnancy, 2423
metabolism of, and rate of secretion, in the bullfrog, 2523
renal handling of, and its acid-labile conjugate, 242
secretion, in non-salt-losing congenital adrenal hyperplasia, 1742
secretion, role of, in extrarenal mechanism of potassium adaptation, 740

* Abstracts listed in the Proceedings of the 60th Annual Meeting of the American Society for Clinical Investigation, Inc., 6 May 1968, are not included in this index.

stimulation of biosynthesis of, by sodium depletion, in the dog, 1425
Alkalosis
metabolic, chronic respiratory adjustment to, in man, 188
metabolic, correction of, by kidney after isometric expansion of extracellular fluid, 1181
Alpha chains
free, in hemoglobin synthesis in β-thalassemia, 860
Alveolar cells
glycoprotein synthesis and evidence for intracellular protein transport in, 366
surface tension, metabolic activity, and lipid composition of, in washings from normal dog lungs, and after pulmonary artery ligation, 336
Amino acid incorporation
effects of short-term fast on, by hepatic microsomes, in the perfused liver, 2591
Amino acids
administration of, effects on glucagon and insulin secretion, 2305
Amphetamine
adipokinetic effect of, 394
Amyloid
isolation of soluble, prepared in water, 924
physicochemical properties of soluble, prepared in water, 924
ultrastructure of soluble, prepared in water, 924
Analgesic abuse
nephropathy of, renal accumulation of salicylate and phenacetin as mechanisms in, 2507
Anemia
acute, disproportional synthesis of the adult duck's two hemoglobins during, 679
congenital Heinz body hemolytic, altered sulfhydryl reactivity of hemoglobins and red blood cell membranes in, 2664
effect of, on hemoglobin phenotype changes in sheep, 1895
hemolytic, with altered phospholipid composition, 1375
hereditary nonspherocytic hemolytic disease, 1375
oxygen dissociation in, 1851
Angioneurotic edema
studies in normal and complement-deficient individuals and in patients with hereditary, 604
Angiotensin
effect of, on absorption rate in renal proximal tubule, 2016
effect of, on blood flow in internal carotid artery in man, 1672
Antibacterial activity
of human urine, 2374
Antibacterial mechanisms
of urinary bladder, 2689
Antibiotic resistance
in urinary infections, 1763
Antibodies
fixation of the first component of complement (C'1a) by, in man, 2430
γG-myeloma proteins with anti-γ-globulin activity, 1875
heterophile, in human transplantation, 633
to DNA, in vitro effect of, on DNA template activity, 1496
Antibody
IgA, in ataxia telangiectasia, 1905
IgA, in newborn and adult sera reactive with Gram-negative bacteria, 1053
IgG, in newborn and adult sera reactive with Gram-negative bacteria, 1053
IgM, in newborn and adult sera reactive with Gram-negative bacteria, 1053
synthesis of, in experimental pyelonephritis, 2541
to urokinase, effect of urokinase antiserum on plasminogen activators, 1238
Antidiuresis
vasopressin, norepinephrine inhibition of, 540
Antidiuretic hormone (ADH)
effect of, on water and solute transport in human small intestine, 1071
effect of position on blood ADH levels, in man, 2143
effect of temperature on blood ADH levels, in man, 2143
release, regulation of, in blood levels in man, 2143
Antigen-antibody complexes
nature of, initiating the specific wheal-and-flare reaction in sensitized man, 556
Antigenic structure
of normal haptoglobin phenotypes, 2290
Arrhythmias
cardiac, hemodynamic effects after conversion of, 1774
Arterial wall metabolism
electrolyte and water content in experimental hypertension of coarctation of aorta, 1221
lipid content in experimental hypertension of coarctation of aorta, 1221
mucopolysaccharide content in experimental hypertension of coarctation of aorta, 1221
Arteries
sterol synthesis in the human arterial intima, 595
Arteriovenous fistula
left ventricular function in experimental, with circulatory congestion and fluid retention, 1333
Ascorbic acid
effect of, on fibroblasts, and definition of biochemical phenotype in Hurler syndrome, 321
Asthma
bronchial, regional lung function in patients with, 1063
Ataxia telangiectasia
immunoglobulin metabolism in, 1905
Atrial fibrillation
pressure-flow studies during, in man, 2411
Auditory perception
and detection in normal man and in patients with adrenal cortical insufficiency, 1269
Autonomic nervous system
effects of blockade of, in pulmonary vascular response to hypoxia, 274

B

B variant
enzymic properties of different types of human erythrocyte G-6-PD, 1833
Bacterial endocarditis
subacute, serum opsonin, bacteria, and polymorphonuclear leukocyte interactions in, 1109
Balance studies
usefulness of chromic oxide as an internal standard for, in formula-fed patients, 127
Baroreceptor-mediated reflexes
role of venous system in, in man, 139
Bicarbonate
effects of, on sodium absorption in the human small intestine, 884
Bile
cholesterol gallstone formation in; physicochemical basis of, in man, 1043
Bile acids
biosynthesis of, in human liver, 1573
fecal, effect of cholestyramine on excretion of, 1664
fecal, and neutral steroid excretion with saturated and polyunsaturated fat diets, in man, 1517
Bile flow
effect of sodium taurolithocholate on bile acid excretion and on, 1002

Bile salts
malabsorption of, in regional ileitis, ileal resection, and mannitol-induced diarrhea, 261
role of, in cholesterol gallstone formation in man, 1043
role of, in controlling rate of intestinal cholesterogenesis, 286
turnover and concentration of, in patients with ileectomy, 1314
Biliary diversion
effect of biliary and pancreatic flow diversion on intestinal absorption, 612
Blood
aggregating forces of, 1447
Blood coagulation
effect of Hageman factor activation on, 1172
Blood flow
cerebral, autoregulation of, 1672
cerebral, effect of norepinephrine, epinephrine, and angiotensin on, in man, 1672
during atrial fibrillation, in man, 2411
in myocardium, effect of heterogeneous perfusion on, 2711
in myocardium, quantitation of, 2711
intrarenal, distribution of, in dogs, 488
reversal, effect of, in liver autotransplants on site of hepatocyte regeneration, 1231
Blood volume
and the red cell mass-arterial oxygen relationship in normal man; application to patients with chronic obstructive airway disease, 1627
Bone marrow cells
metabolism of iron in, 1473
Bradykinin
potent constrictor of the human umbilical artery, 1295
Brain metabolism
effect of thiamine deficiency on, 2268
in uremic and adenosine-infused rats, 2133
Brain potassium
in response to acute and sustained hyper- and hyponatremia, 1916
Brain swelling
factors that limit, changes in response to acute and sustained hyper- and hyponatremia, 1916
factors that limit, in acute and sustained hyper- and hyponatremia, 1916

C

C'
role of, in chronic hemolytic anemia due to cold agglutinins, 691
C' esterase
effect of, on vascular permeability in man, 604
C'1a fixation
of first component, by human antibodies, 2430
C'3
genetic polymorphism of human, 2181
in vivo metabolism of, in acquired hemolytic anemia, 2469
Calcification
in cartilage, partition of calcium, phosphate, and protein in the fluid phase aspirated at calcifying sites, 1121
Calcium
concentration of, in serum, effect on phosphate excretion in uremic man, 1865
kinetics of, in idiopathic hypercalciuria, 2580
metabolism, effect of dibutyryl cyclic AMP, theophylline, and other nucleotides on, 1843
partition of, in the fluid phase aspirated at calcifying sites in epiphyseal cartilage, 1121
regulation of, by parathyroid glands, in magnesium-deficient rats, 118
transport of, by skeletal muscle sarcoplasmic reticulum, in hypothyroid rat, 2499
Canine cholera
experimental, site and characteristics of electrolyte loss and effect of intraluminal glucose in, 1210
Canine duodenum
response of, to intraluminal challenge with cholera exotoxin, 2600
Capillary basement membrane
of muscle, in normal subjects, diabetic, and prediabetic patients, 1973
Carbon dioxide
labeled, rate of disappearance of, from lungs of humans during breath holding, 1535
method for studying the dynamics of pulmonary exchange of, 1535
Cardioversion
hemodynamic effects after, of arrhythmias, 1774
Carnitine
levels and role of, in normal and failing hearts, 1787
Carotid artery
effect of norepinephrine, epinephrine, and angiotensin on blood flow in internal and external, in man, 1672
Catecholamines
biosynthesis of, α-methyltyrosine as an inhibitor of, 568
turnover of, in normo- and hypertensive man, 2359
urinary excretion of, effects of emotional stress on, in man, 1795
Chest wall resistance
in patients with obstructive lung disease, 1455
Chloride deficiency
correction of metabolic alkalosis by the kidney after isometric expansion of extracellular fluid, 1181
Cholestasis
effect of sodium taurolithocholate on bile flow and bile acid excretion, 1002
Cholesterogenesis
intestinal, role of bile salts in controlling rate of, 286
Cholesterol
biosynthesis of, control mechanisms in different tissues, in monkeys, 167
effect of dietary fat on fecal excretion of, 1517
effect of neomycin on exchangeable pools of, in the steady state, in man, 1806
esterified, turnover of, in patients with nephrotic syndrome, 1685
gallstone formation in man; physicochemical basis of, 1043
in vivo biosynthesis of, in monkey intestine, 175
metabolism of, in bile acids in human liver, 1573
plasma, turnover of, in man, 231, 1806
role of bile salts in controlling synthesis rate of, 286
serum, biosynthetic origin in the monkey, 175
serum, intestinal contribution, in monkey, 175
solubility of, in bile from patients with gallstones, 1043
synthesis of, in human arteries, 595
turnover and excretion of, effects of cholestyramine on, 1664
turnover of, in plasma, 231, 1806
Cholestyramine
effects of, on fecal bile acids and sterol excretion, in man, 1664
Cholic acid
effect of, on absorption of bile acids from large bowel, in man, 2070
Chondroitin sulfate
regional distribution of, in kidney, 2125
Chorionic gonadotropin
cross-reactivity with antibody to human follicle-stimulating hormone, 1722

Chromic oxide
usefulness of, as internal standard for balance studies in formula-fed patients and for assessment of colonic function, 127
Chromosome
sex-linked traits, X-inactivation, in first Negro family, 1415
Circadian periodicity
nature of, in tryptophan metabolism, 934
Cirrhosis
estradiol metabolism in, 20
Clearance
of urine proteins, effect of exercise on, 386
Coagulation
blood, phospholipid requirement of tissue factor in, 72
fibrin, inhibitor of fibrin cross-linking, 268
Cobalt chloride
effect of, on erythropoiesis in stimulated rat spleen, 2230
Colicin
action, in urinary infections, 1763
Colicinogeny
transfer of, in urinary infections, 1763
Collagen
activation of Hageman factor by, 2608
aggregation of platelets by, 2616
degradation of, by a human granulocyte collagenolytic system, 2622
platelet adherence to, 466
Collagenase
influence of, on degradation of collagen by a human granulocyte collagenolytic system, 2622
studies on, from rheumatoid synovium in tissue culture, 2639
Colon
absorption of bile acids from, in man, 2070
Colonic function
assessment of, with chromic oxide as an internal standard for balance studies in formula-fed patients, 127
emptying, output of, with chromic oxide as an internal standard for balance studies and assessment of, in formula-fed patients, 127
turnover of, with chromic oxide as an internal standard for balance studies and assessment of, in formula-fed patients, 127
Compensatory renal hypertrophy
functional correlates of, 774
hormonal inhibitor of proximal tubular reabsorption during, with isotonic saline, 761
Complement
role of, in red blood cell destruction, 691
studies in normal and complement-deficient individuals and in patients with hereditary angioneurotic edema, 604
Compliance
static, measurement of, 1455
Cone-plate viscometry
direct observation of blood flow at defined shear rate with, 1447
Congenital adrenal hyperplasia
aldosterone hypersecretion in, 1742
Congestion
circulatory, left ventricular function in experimental aortocaval fistula with, and fluid retention, 1333
Contact hypersensitivity
transfer of, with dialysate of peripheral leukocytes, in man, 2152
Copper
effect of, on iron metabolism, in swine, 2058
Corticosteroids
effect of, on development of methionine-activating enzyme and its relation to hormonal influences, in mammals, 2099
γG-Cryoglobulins
human monoclonal, with anti-γ-globulin activity, 1875

D

Deoxycholic acid
effect of, on absorption of bile acids from large bowel, in man, 2070
Deoxyribonucleic acid (DNA)
in vitro effect of antibodies to, on template activity of, 1496
synthesis of, in rat adipose tissue, 2485
Diabetes insipidus
hypothalamic, urinary concentration in, 502
Diabetes mellitus
muscle capillary basement membrane thickness in patients with, 1973
Diarrhea
mannitol-induced, bile salt malabsorption in, 261
Dicumarol
genetic control of its levels in blood, in man, 2657
Diffusing capacity
of carbon dioxide, from lungs of persons during breath holding, 1535
Digitalis
effect of, on development of acetylstrophanthidin-induced arrhythmias, 1885
measurement of digitoxin in human serum by radioimmunoassay, 1035
Digitalis toxicity
measurement of digitoxin in human serum by radioimmunoassay, 1035
Diphenylhydantoin
effect of, on synaptosome sodium-potassium-ATPase, 2752
2,3-Diphosphoglyceric acid
in red blood cells, relationship between oxygen dissociation and, 2652
DNCB (1-chloro-2,4-dinitrobenzene)
contact sensitivity to, in man, 2152
Dopa (3,4-dihydroxyphenylalanine)
effects of, on catecholamine turnover in normo- and hypertensive man, 2359

E

ECHO-11
respiratory virus, quantitation of infection in man, 1303
Electrolyte loss
site and characteristics of, in experimental canine cholera, 1210
Emphysema
airway conductance, effect of surgical resection on, in patients with, 2569
Enzymes
in fructose metabolism in human liver, 1826
Epididymal fat pad
effects of nutrition on cell number and size of, in rat, 2091
Epinephrine
effect of, on blood flow in internal carotid artery of man, 1672
effect of, on hyperventilation, 1672
Epiphyseal cartilage
partition of calcium, phosphate, and protein in the fluid phase aspirated at calcifying site in, 1121
Erythrocyte
metabolism, inherited molecular lesion of, pyruvate kinase, 1929
Erythrocytes
aging of, and decline of G-6-PD levels in Gd^{A-} and $Gd^{Mediterranean}$ deficiency, 940
cholesterol content in pathogenesis of target cells in obstructive jaundice, 809
concentration dependence of active potassium transport in human, in the presence of inhibitors, 949
consequence of heterogeneous distribution of hemoglobin types in sickle-cell anemia, 1731
deficiency of G-6-PD activity in human, 66

effect of bile salts on, 809
fatty acid uptake in vitro of, 1096
glucose and glycogen metabolism in, from normal subjects and patients with glycogen storage disease, 1343
glutathione metabolism in human, 66
hemoglobin CC, cell water in, 1483
hemoglobin F, consequence of heterogeneous distribution of, in sickle-cell anemia, 1731
in human transplantation, 2206
iron, utilization of, in copper-deficient swine, 2058
life span of, after splenectomy, in patients with hereditary spherocytosis, 2263
metabolism of iron in, 1473
organic phosphate content and oxygen dissociation, relationship in, 2652
phospholipid abnormalities in hereditary hemolytic anemia, 1375
phospholipid turnover in, by orthophosphate-^{32}P, in patients with hereditary spherocytosis and normal man, 2630
red cell mass–arterial oxygen relationship in normal man; application to patients with chronic obstructive airway disease, 1627
role of reduced nicotinamide adenine dinucleotide in reduction of endogenous oxidized glutathione in human, 66
studies of stromal proteins in Tay-Sachs disease, 1858
studies on sequestration and hemoglobin catabolism of, 1435
synthesis of hemoglobin in duck during acute anemia, 679

Erythropoiesis
effect of erythropoietin on, in stimulated rat spleen, 2230
effect of Walker 256 carcinosarcoma on, in stimulated rat spleen, 2230
ferrochelatase activity, index of, in stimulated rat spleen, 2230

Erythropoietin
effect of, on hemoglobin production in sheep, 1895

Estradiol
metabolism in cirrhosis, 20

Estradiol and estriol
interconversions of, in normal males and females, 93

Estrogens
extrasplanchnic and splanchnic metabolism of, in normal males and females, 93

Ethacrynic acid
potassium transport in the human red blood cell in the presence of, 949

Etiocholanolone
role of, in production of leukocyte pyrogen in vitro in steroid fever, 107

Exophthalmos
increased urinary excretion of acidic mucopolysaccharides in, 2563

Extracellular volume
expansion of, demonstration of a hormonal inhibitor of proximal tubular reabsorption during, with isotonic saline, 761
expansion of, sodium excretion in uremic man after, 521
isometric expansion of, correction of metabolic alkalosis by the kidney after, 1181

Extrarenal mechanism
of potassium adaptation, 740

F

Factor XII
activation of, by collagen, 2608

Fanconi syndrome
of children with cystinosis, resemblance of an experimental renal acidification defect in patients with hereditary fructose intolerance to renal acidification defect associated with, 1648

Fat assimilation
dietary, effect of, on fecal steroid excretion, in man, 1517

Fatty acids
absorption of, from emulsions, 1015
absorption of, from micellar solutions, 1015
medium chain, effect of biliary and pancreatic flow diversion on absorption of trioctanoin, 612
oxidation of, in normal and failing hearts in vitro, 1787

Ferritin
synthesis in bone marrow cells, 1473

Ferrochelatase activity
as index of erythropoiesis in stimulated rat spleen, 2230

Fetal circulation
effect of maternal oxygen inhalation on, 548

Fibrin
cross-linking, inhibition of, by amines, 268

Fibrinogen
measurement of synthesis rates of, in control subjects and patients with gastrointestinal protein loss, 971

Fibroblasts
skin, variations in purine metabolism of, from patients with gout, 1511

Follicle-stimulating hormone
antibody to, cross-reactivity with three other hormones, 1722
radioimmunoassay for, in human serum, 2551

Free fatty acids
effect of, on mitochondrial function, 2344
effects of amphetamine and metamphetamine on, 394
incorporation of, into red cell phospholipids, 1096
uptake of, by red blood cells, 1096

Fructose
in jejunum, absorption of, control of sucrase and maltase activity by, in man, 2253
metabolism in human liver, 1826

Fructose intolerance
hereditary, experimental renal acidification defect in patients with; distinction from classic renal tubular acidosis, 1648
hereditary, experimental renal acidification defect in patients with; resemblance to renal tubular acidosis, 1389

G

Galactose
effect of, on sodium absorption in the human small intestine, 884

Gallstone
cholesterol, formation in man; physicochemical basis of, 1043

Genetic linkage
of hereditary sideroblastic anemia and G-6-PD deficiency, in first Negro family, 1415

Genetic polymorphism
of human C'3, 2181

Genetic transmission
of leukocyte defect in fatal granulomatous disease of childhood, 1026

Genetics
control of dicumarol levels in blood, in man, 2657
renal tubular transport of proline, hydroxyproline, and glycine, 823

Globin chain
synthesis in alpha thalassemia syndromes, 2515

α_1-α_2-Globulin
urate-binding, in individuals from two gouty kindreds, 1254

Globulins
anti-gamma, factors, and their interaction with specific opsonins, 1109

gamma, mechanisms of maternofetal transfer of, in the mouse, 1204
gamma, myeloma proteins with anti-γ-globulin activity, 1875
testosterone-binding, in human plasma, 2109
Glomerular filtration rate
decreased, effect of, on sodium excretion, 521
in renal hypertrophy, 774
relationship between, and sodium reabsorption by proximal tubule of rat nephron, 1359
Glomerulotubular balance
in renal proximal tubule, in rabbits, 2016
Glucagon
acute lipid mobilization by, toxic effects in geese, 2701
circulating, characterization of response of, to intraduodenal and intravenous administration of amino acids, 2305
circulating, response to pancreozymin and hyperglycemia, 2305
Glucagon-like immunoreactivity
extrapancreatic origin of, 48
responses of, to intraduodenal and intravenous administration of glucose, 48
Glucose
absorption, mechanisms of, in the human small intestine, 884
effect of intraluminal, in experimental canine cholera, 1210
influence of blood glucose concentration in hyperglycemia, in nondiabetics, 1262
reabsorption, renal, influence of saline loading on, in rat, 329
titration studies for abnormal splay in glucosuric subjects, 702
titration studies in nephritic subjects, 702
tolerance tests in prediabetic males, 729
uptake, relationship between endogenous serum insulin concentration and, in forearm muscles of nondiabetics, 1262
Glucose-6-phosphate dehydrogenase (G-6-PD)
deficiency and hereditary sideroblastic anemia, in first Negro family, 1415
in Gd^{A-} and $Gd^{Mediterranean}$ deficiency; decline of G-6-PD levels with erythrocyte aging, 940
Glucosuria
in normal and nondiabetic subjects, 702
Glycerophosphate acyltransferase
effect of diet on, in rat liver, 712
Glycine
excretion in renal tubular transport, 823
metabolism of, suppression of glycine-^{15}N incorporation into urinary uric acid by adenine-8-^{13}C in normal and gouty subjects, 1193
Glycogen
isolation of, characteristics of synthesis and turnover, in vitro, 344
leukocyte, macromolecular state of, in human peripheral blood leukocytes, 353
metabolism of, in erythrocytes, 1343
storage disease and erythrocyte metabolism, 1343
Glycoproteins
erythrocytes, in Tay-Sachs disease, 1858
synthesis, in alveolar cells, and evidence for intracellular protein transport, 366
Gout
primary, genetic studies in, 1254
studies on plasma levels of urate-binding α_1-α_2-globulin in, 1254
suppression of glycine-^{15}N incorporation into urinary uric acid by adenine-8-^{13}C in normal subjects and patients with, 1193
variations in purine metabolism of skin fibroblasts from patients with, 1511
Gram-negative bacteria
antibodies in newborn and adult sera reactive with, 1053
influence of bacteriocins on resistance to infection by, 1763
Granulocyte
human, collagenolytic system, degradation of collagen by, 2622
Granulomatous disease
of childhood, leukocyte degranulation and vacuole formation in patients with, 1753
of childhood, pattern of genetic transmission of the leukocyte defect in, 1026
Growth hormone
effect of adrenergic blockade during insulin hypoglycemia on levels of, 1407
effects of CNS-active drugs on levels of, during sleep, 2079
human, levels in prediabetic males, 729
human, metabolic effects of, in corticosteroid-treated children, 436
plasma, in corticosteroid-treated children, 427
plasma levels of, during sleep, 2079
secretion of, during sleep, 2079

H

Hageman factor
activation, inhibition of, 1172
activation of, by collagen, 2608
Haptoglobin Bellevue
immunogenetics of, a cross-reacting mutant, 2297
Haptoglobins
immunogenetics of human, 2290, 2297
Heart failure
carnitine levels, in ventricular homogenates, 1787
congestive comparison of effects of vasodilator stimuli on peripheral resistance vessels in normal subjects and in patients with, 960
defective lipid metabolism in, in guinea pigs, 1787
fatty acid oxidation in ventricular homogenates, 1787
myocardial, index of the contractile state of heart disease, in man, 1615
Heavy chain
subclasses, catabolism of human γG-immunoglobulins of different, 2323
Heinz body hemolytic anemia
congenital, altered sulfhydryl reactivity of hemoglobins and red blood cell membranes in, 2664
Hemodynamics
effects in, after conversion of arrhythmias, 1774
in myocardium, index of the contractile state of, in man, 1615
Hemoglobin
absorption of iron, role of heme-splitting substance in the intestinal mucosa, 531
altered sulfhydryl reactivity of, in congenital Heinz body anemia, 2664
changes in, phenotype; studies in erythropoietic kinetics in sheep, 1895
consequence of heterogeneous distribution of, in sickle-cell anemia, 1731
effect of altitude on oxygen binding, 2652
malabsorption of iron, in pernicious anemia, 1819
oxygen dissociation in, 1851
oxygen dissociation and organic phosphate levels in, effect of altitude on, 2652
studies on rate of catabolism, in vivo, 1435
synthesis of adult duck's two hemoglobins during acute anemia, 679

synthesis of, in bone marrow cells, 1473
synthesis of, in α-thalassemia, 2515
synthesis of, in β-thalassemia, 860
synthesis of, and iron incorporation in, 1473
Hemoglobin CC
disease, rheological properties of cells, 1483
Hemoglobin F
disease, consequences of heterogeneous distribution of, in sickle-cell anemia, 1731
Hemoglobin H
disease, globin chain synthesis in, 2515
Hemolysis
studies on red blood cell sequestration, 1435
Hemolytic anemia
due to pyruvate kinase deficiency, 1929
Hemophilia B
genetic variant and detection of, 360
Hemorrhage
effect of, and retransfusion on intrarenal distribution of blood flow in dogs, 488
Heparitin sulfate
regional distribution of, in kidney, 2125
Hepatic microsomes
effects of short-term fast on amino acid incorporation by, in the perfused liver, 2591
Hepatocyte regeneration
effect of blood flow reversal in liver autotransplants on site of, 1231
Hereditary disorders
hemophilia B, detection of, genetic variant, 360
Hereditary spherocytosis
red cell life span after splenectomy, 2263
Histamine
influence of, on vascular permeability with C'1 esterase, in man, 604
release, role of neural reuptake of norepinephrine and, 511
Homograft rejection
in human transplantation, 633
Hormonal inhibitor
of proximal tubular reabsorption, demonstration of, during expansion of extracellular volume with isotonic saline, 761
Hurler syndrome
fibroblasts, study of, with cell culture, 321
Hyaluronic acid
regional distribution of, in kidney, 2125
Hydroxylation
of progesterone at 21 position in non-salt-losing congenital adrenal hyperplasia, 1742
Hydroxyproline
excretion of, in renal tubular transport, 823
Hypercalcium
influence of parathyroid glands on maintenance of, in magnesium-depleted rats, 118
Hypercapnia
acute, effect of, on development of acetylstrophanthidin-induced arrhythmias, 1885
Hyperglycemia
capillary basement membrane thickness in, 1973
Hypertension
acute, effect of, on sodium reabsorption by the proximal tubule, in rats, 1696
duration of left ventricular ejection time, effect of steady-state increases in systemic arterial pressure on, 217
experimental, arterial wall metabolism in, of coarctation of aorta of short duration, 1221
Hypothyroidism
calcium transport by skeletal muscle sarcoplasmic reticulum in, in rats, 2499
Hypoventilation
alveolar adjustment to chronic metabolic alkalosis, in man, 188
Hypoxemia
and the red cell mass–arterial oxygen relationship in normal man; application to patients with chronic obstructive airway disease, 1627
Hypoxia
acute, effect of, on development of acetylstrophanthidin-induced arrhythmias, 1885
effect of, on hemoglobin oxygen dissociation, 1851

I

Idiopathic hypercalciuria
metabolic and calcium kinetic studies in, 2580
IgA
levels in ataxia telangiectasia, 1905
Ijebu-Ode variant
comparison of, with enzymic properties of different types of human erythrocyte G-6-PD, with characterization of two new genetic variants, 1833
Ileal resection
bile salt malabsorption in, 261
Ileectomy steatorrhea
bile salt and micellar fat concentration in proximal small bowel contents of patients with, 1314
Ileitis
regional, bile salt malabsorption in, 261
Ileum
bile salt malabsorption in regional ileitis, ileal resection, and mannitol-induced diarrhea, 261
binding of intrinsic factor by macromolecular factor in, 913
effect of ADH on water and solute transport in, 1071
mechanisms of sodium absorption in the human, 884
Immunogenetics
of human haptoglobins, 2290
Immunoglobulin
in vitro synthesis of, by rheumatoid synovial membrane, 624
metabolism of, in ataxia telangiectasia, 1905
γG-Immunoglobulins
catabolism of human, of different heavy chain subclasses, in man, 2323
Immunology
measurement of digitoxin in human serum by radioimmunoassay, 1035
Indicator washout curves
evaluation of ventricular volume measurements from, 848
Infantile nutrition
effects of, on adipose cell number and size, in rat, 2091
Infectious mononucleosis
cell lines in tissue cultures of, 2391
immunoglobulin synthesis in cell cultures of, 2391
Insulin
comparison of immunological and biological properties of antibody-bound unlabeled, with antibody-bound insulin-^{125}I, 474
immunological, serum, relationship between endogenous concentration of, and glucose uptake in forearm muscles of nondiabetics, 1262
immunoreactive, levels in prediabetic males, 729
iodo-, isolation from crude, 474
irreversible loss rate, in normal and diabetic subjects, 1947
plasma, turnover of, in normal and diabetic subjects, 1947
Insulin-like activity
nature of, by chromatography and electrophoresis, in human serum, 301

nonsuppressible, two forms of, in human serum, 2678
not inhibited by insulin antiserum, characterization of, in serum and serum fractions, 301
Intestinal absorption
human, effect of ADH on, 1071
in experimental canine cholera, 1210
of emulsified and micellar fatty acids, 1015
of glucose in man, role of sodium in, 1133
rate-limiting steps in steady-state, of trioctanoin-1-^{14}C, 612
Intestinal cholesterogenesis
role of bile salts in controlling rate of, 286
Intestinal fluid circuit
mechanisms of sodium absorption in the human small intestine, 884
Intestinal fluid loss
site and characteristics of, in experimental canine cholera, 1210
Intestinal secretion
in experimental canine cholera, 1210
Intestine
cholesterol synthesis and contribution to circulatory pool, in monkey, 175
mucosa, role of heme-splitting substance in, and absorption of hemoglobin iron, 531
role of bile salts in controlling rate of cholesterol in, 286
Intrathoracic stretch receptors
effect of changes in activity of, on ADH release, in man, 2143
Intrinsic factor
interaction with ileal extracts, immunologic identification of, 913
interaction with vitamin B_{12}, immunologic identification of, in ileum, 913
Iron
absorption in copper-deficient swine, 2058
absorption of, in hemoglobin, 531
absorption of, in hemoglobin, in pernicious anemia, 1819
absorption of, role of intrinsic factor–containing substances, in pernicious anemia, 1819
incorporation into hemoglobin, 1473
malabsorption of, in pernicious anemia, 1819
metabolism in copper-deficient swine, 2058
Iron deficiency
effect of manganese on, in man, 643
Isoagglutinins
effects of pretreatment with ABO group–specific antigens, 2206
Isotopes
oxygen, determination of total body exchangeable oxygen stores by, 2402
Ita-Bale variant
comparison of, with enzymic properties of different types of human erythrocyte G-6-PD, with characterization of two new genetic variants, 1833

J

Jejunum
effect of ADH on water and solute transport, in the human small intestine, 1071
mechanisms of sodium absorption, in the human, 884
sugar absorption, control of sucrase and maltase activity in, by dietary sucrose or fructose, in man, 2253

K

Kallikrein
activation of, by neonatal granulocytes, 1295
Kidney
amino acid transport, genetic basis for, in the human, 823
demonstration of hormonal inhibitor of proximal tubular reabsorption during expansion of extracellular volume with isotonic saline in, 761
functional correlates of renal hypertrophy, 774
glucose reabsorption in, influence of saline loading on, in rat, 329
influence of norepinephrine inhibition of vasopressin antidiuresis in, 540
local immune response in experimental pyelonephritis, 2541
methionine-activating enzyme in alteration of development of, and its relation to hormonal influences, in mammals, 2099
phosphaturic effect of sodium bicarbonate and acetazolamide in the, in dog, 983
proximal tubule, effect of acute hypertension on sodium reabsorption in, in rats, 1696
regional distribution of acid mucopolysaccharides in, in dog, 2125
relationship between glomerular filtration rate and sodium reabsorption by proximal tubule of rat nephron, 1359
Kidney function
micropuncture study on, in the Rhesus monkey, 203
Kinins
possible mediators of neonatal circulatory changes in man, 1295

L

Large bowel
absorption of bile acids from, in man, 2070
Lecithin
red blood cell, and plasma exchange in man and dog, 749
role of, in physicochemical basis of cholesterol gallstone formation in man, 1043
Leukocyte
degranulation and vacuole formation in patients with chronic granulomatous disease of childhood, 1753
Leukocyte defect
in fatal granulomatous disease of childhood, pattern of genetic transmission of, 1026
Leukocyte pyrogen
role of production of, in vitro by etiocholanolone, in steroid fever, 107
Leukocytes
increased synthesis of phospholipid during phagocytosis, 2217
leukokinetic studies of mechanism of cortisol-induced granulocytosis, 249
peripheral, transfer of contact hypersensitivity with dialysate of, in man, 2152
Leukocytosis
leukokinetic evaluation of mechanism of cortisol-induced granulocytosis, 249
Lipid mobilization
glucagon-induced acute, toxic effects in geese, 2701
Lipids
incorporation of acetate and palmitate into, by human platelets, 1590
plasma, effects of experimentally induced emotional stress on, 1795
plasma, effects of nicotinic acid and experimentally induced emotional stress on, 1795
Lipoprotein
metabolism of, effect of adenine phosphoribosyltransferase deficiency on, 2281
Lipoprotein patterns
comparison of, by electrophoresis and analytical ultracentrifugation, 2446
comparison of, by two different techniques, in hyperlipoproteinemias, 2446
comparison of, by two different techniques, in inherited lipoprotein deficiencies, 2446
Liver
human, enzymes of fructose metabolism in, 1826

metabolism of cholesterol into bile acids, in man, 1573
methionine-activating enzyme in, alteration of development of, and its relation to hormonal influences, in mammals, 2099
Liver autotransplants
effect of blood flow reversal in, on site of hepatocyte regeneration, 1231
Liver disease
effect of, on erythrocytes, 809
Liver perfusion
effects of short-term fast on albumin synthesis in, 2591
Lung
effect of removal of bullae on airway conductance, 2569
glycoprotein synthesis and evidence for intracellular protein transport in, 366
Luteinizing hormone
cross-reactivity with antibody to human follicle-stimulating hormone, 1722
human, radioimmunoassay for, in plasma levels in males and in females during menstrual cycle, 665
metabolic clearance and production rates of, in pre- and postmenopausal women, 38
Lymphocytes
in vitro behavior of agammaglobulinemic, in agammaglobulinemia, 836
normal human small, changes induced by phytohemagglutinin stimulation, 1083
normal human small, characteristics of RNA synthesized in vitro by, 1083

M

Macrophages
increased synthesis of phospholipids during phagocytosis, 2217
Magnesium depletion
influence of parathyroid glands on hypercalcemia, in rat, 118
Maltase activity
in jejunum, control of sucrase and, by dietary sucrose or fructose, in man, 2253
Manganese
metabolism of, in active rheumatoid arthritis, effect of prednisone on, 992
studies on red blood cells of radiomanganese half-life and factors affecting half-life in iron deficiency, in man, 643
turnover of, in active rheumatoid arthritis accelerated by prednisone, 992
Maternofetal transfer
of human albumin and γG-globulin, on the mechanisms of, in mouse, 1204
Megakaryocyte
quantitation of, 452
Metabolism
of immunoglobulin in ataxia telangiectasia, 1905
of α-methyltyrosine, in man, 568, 577
of thyroid, long-acting thyroid stimulator effects on, in vitro, 1553
Metamphetamine
adipokinetic effects of, 394
L-Methionine
absorption of, from the human small intestine, 417
α-Methyltyrosine
biochemical and pharmacologic effects of, in man, 577
Micelles
fat concentration in, after ileectomy, 1314
Micropuncture
study of nephron function by, in Rhesus monkey, 203
Microsomes
in alveolar cells, glycoprotein synthesis and evidence for intracellular protein transport in, 366
Mitochondria
effect of albumin on, 2331
effect of free fatty acids on, 2344
effect of phenethylbioguanide on, 2344
Mutant
cross-reacting, immunogenetics of human haptoglobins, 2297
γ-Myeloma proteins
catabolism of, in man, 2323
Myocardial function
control of myocardial oxygen consumption, relative influence of contractile state and tension development in, 375
Myocardium
anoxic, role of anaerobic metabolism in preservation of functional capacity and structure of, 403
effect of perfusion on coronary blood flow, 2711
index of the contractile state of, in man, 1615
mechanics of, in aortic and mitral valvular regurgitation, 869

N

Neomycin
effect of, on cholesterol metabolism in man, 1806
Neonatal circulation
kinins: possible mediators of, changes in man, 1295
Nephron function
micropuncture study of, in Rhesus monkey, 203
Nephrotic syndrome
turnover of plasma triglyceride and esterified cholesterol in, 1685
Newborn antibodies
reactive with Gram-negative bacteria, 1053
Nonionic diffusion
renal excretion of urobilinogen by, in dog, 2117
Non-Newtonian viscosity
of blood, reversible aggregation of red cells in, 1447
Noradrenaline
effects of, on catecholamine turnover in normo- and hypertensive man, 2359
Norepinephrine
capacitance and resistance vessels' response to, in man, 1
effect of, on blood flow in internal carotid artery of man, 1672
effect of, on vasopressin antidiuresis, 540
role of neural reuptake of, and release of histamine, 511
Nutrition
effect of, on albumin metabolism, 1958

O

$^{18}O_2$
determination of total body exchangeable oxygen stores by, 2402
Obesity
relation of adipose cell size and adipose tissue insulin sensitivity in carbohydrate intolerance of human, 153
Obstructive pulmonary disease
chronic, left ventricular function in patients with, 1143
frequency dependence of flow resistance in patients with, 1455
Osmolality
factors that limit brain volume changes in response to acute and sustained hyper- and hyponatremia, 1916
Oxygen diffusion
effect of maternal, on fetal oxygenation, 548
Oxygen stores
determination of total body exchangeable, 2402

P

Pancreatic diversion
effect of biliary and, 612
Parathyroid
influence of, on hypercalcemia of experimental magnesium depletion, in rat, 118

Parathyroid hormone
effect of, on phosphate excretion, in uremic man, 1865
effect of, on sodium excretion in uremic man, 521
urinary excretion of, in man, 1583
Penicillin
sensitivity to, in man, 556
Peripheral circulation
comparison of effects of vasodilator stimuli on, in normal subjects and patients with congestive heart failure, 960
Permeability response
of collecting tubule, effect of prostaglandin E_1 on, to vasopressin, adenosine 3′,5′-monophosphate, and theophylline, 1154
pH
effect of, on renal excretion of urobilinogen, in dog, 2117
Phagocytosis
increased synthesis of phospholipid during, 2217
Phenacetin
renal accumulation of, in nephropathy of analgesic abuse, 2507
Phenethylbiguanide
effect on mitochondrial function, 2331
Phenotype
antigenic structure of normal haptoglobin, 2290
Phenylbutazone
genetic control of, levels in blood, in man, 2657
Phosphate
excretion, control of, in uremic man, 1865
excretion, effect of sodium bicarbonate and acetazolamide on, in dogs, 983
metabolism, effect of dibutyryl cyclic adenosine 3′,5′-monophosphate, theophylline, and other nucleotides on, 1843
partition of, in fluid phase aspirated at calcifying sites in epiphyseal cartilage, 1121
Phosphaturia
phosphaturic effect of sodium bicarbonate and acetazolamide in dogs, 983
Phospholipid
plasma, exchange with red blood cells in man and dog, 749
requirement of tissue factor in blood coagulation, 72
synthesis, increase of, during phagocytosis, 2217
Phospholipid abnormalities
of red cells in hereditary hemolytic anemia, 1375
Placental circulation
effect of maternal oxygen inhalation upon fetal oxygenation, 548
Plasma concentration
of growth hormone, in corticosteroid-treated children, 427
Plasma proteins
composition of, red cell aggregation, in vitro, 1447
quantitative immunological determination of, in urine, 386
Plasma transport
of vitamin A, in man, 2025
Plasminogen activator
effect of urokinase antiserum on, 1238
Platelet
age, effect of, on adherence to collagen, 466
factor 3 deficiency, in normal subjects and patients with renal failure, 901
human, protease activity of, 2530
measurement of kinetics during thrombocytopenia and thrombocytosis, 458
nucleotide metabolism of; effect of ADP, thrombin, and epinephrine on, in man, 2158
Platelets
aggregation of, by collagen, 2616
ATP and ADP metabolism of, 2169
effect of salicylates on hemostatic properties of, in man, 2169
incorporation of acetate and palmitate into lipids by, 1590
influence of enzyme activity, in human, 2530
Polymorphonuclear leukocytes
interaction in subacute bacterial endocarditis, 1109
Pool size
turnover of plasma cholesterol in man, 231
Potassium
transport in red blood cells, concentration dependence of, in presence of inhibitors, 949
Potassium adaptation
extrarenal mechanism of, 740
Potassium loads
extrarenal mechanism of adaptation to, 740
Prealbumin
interaction with retinol-binding protein, in human plasma, 2025
thyroxine binding by immunoadsorption, 1710
Prediabetes
intravenous glucose tolerance tests, in males, 729
intravenous tolbutamide tolerance tests, in males, 729
muscle capillary basement membrane thickness in, 1973
Prednisone
effect of, on manganese in active rheumatoid arthritis, 992
Pregnancy
aldosterone metabolism during, 2423
Progesterone
effect of, in non-salt-losing congenital adrenal hyperplasia, 1742
effect of, on protein, avidin, and RNA synthesis, 654
Proline
excretion, renal, in tubular transport, 823
Prostaglandin E_1
effect of, on permeability response of the isolated collecting tubule to vasopressin, adenosine 3′,5′-monophosphate, and theophylline, 1154
Protease activity
in human platelets, 2530
Protein
effect of dietary intake of, on albumin metabolism, 1958
multiple myeloma, with anti-γ-globulin activity, 1875
synthesis of alveolar cells, evidence for intracellular protein transport, 366
synthesis of, avidin, action of progesterone in regulation of, 654
Protein catabolism
direct measurement of rates of, in control subjects and patients with gastrointestinal protein loss, 971
Protein loss
gastrointestinal, measurement of synthesis rates of plasma proteins in, 971
Protohaem ferro-lysase
activity of, as index of erythropoiesis, 2230
Proximal tubule
experimental renal acidification defects in patients with hereditary fructose intolerance, 1648
influence of saline loading on glucose reabsorption in, of rat, 329
of dog kidney, depression of fractional sodium reabsorption by, without sodium diuresis, 1561
of rabbit kidney, control of fluid absorption in, 2016
renal convoluted, control of fluid absorption in, 2016
renal straight, control of fluid absorption in, 2016
PTC inhibitor (plasma thromboplastin component)
detection of genetic variants of hemophilia B by a specific, 360
Pulmonary artery
evaluation of ventricular volume measurements from indicator washout curves, 848

Pulmonary circulation
differential reactivity in, 800
effects of hypoxia on, with alpha adrenergic blockade and tissue catecholamine depletion, 274
effects of surface tension, metabolic activity, and lipid composition from washings of alveolar cells and after pulmonary artery ligation, in normal dog lungs, 336
longitudinal distribution of vascular resistance in pulmonary arteries, capillaries, and veins, 783
Pulmonary function
regional distribution of, in elderly subjects, 81
Purine metabolism
of skin fibroblasts from patients with gout, 1511
study of, in a xanthinuric female, 1325
Pyelonephritis
local immune response in experimental, 2541
Pyruvate kinase deficiency
identification of kinetically aberrant isozyme associated with premature hemolysis, 1929
inherited molecular lesion of erythrocyte, 1929

R

Radioimmunoassay
for ACTH in plasma, in man, 2725
for human follicle-stimulating hormone in human sera, 2551
for human luteinizing hormone in plasma, 665
Reflex vasodilation
mechanisms of, 511
Renal acidification defect
experimental, in patients with hereditary fructose intolerance, 1375, 1648
Renal collecting tubule
effect of prostaglandin E_1 on permeability response of, to vasopressin, adenosine 3′,5′-monophosphate, and theophylline, 1154
Renal dialysis
for reversal of platelet deficiency, 901
Renal disease
chronic, metabolism of vitamin D_3 in, 2239
Renal handling
of aldosterone and its acid-labile conjugate, 242
Renal hypertrophy
functional correlates of, 774
hormonal inhibitor of proximal tubular reabsorption during, with isotonic saline, 761
Renal tubular acidosis
resemblance to renal acidification in patients with hereditary fructose intolerance, 1375
Resistance
cerebral vascular, effect of norepinephrine, epinephrine, and angiotensin on, in man, 1672
Respiration
control of, in chronic metabolic alkalosis, in man, 188
mechanics of, evaluation of forced oscillation technique for determination of resistance to, 2045
Respiratory resistance
evaluation of forced oscillation technique for determination of, 2045
Respiratory virus
ECHO-11, quantitation of infection of, in man, 1303
Retinol-binding protein
transport protein for vitamin A in human plasma, 2025
Rhesus monkey
micropuncture study of nephron function in the, 203
renal tubular handling of aldosterone and its acid-labile conjugate in the, 242
Rheumatoid arthritis
slow turnover of manganese in active, accelerated by prednisone, 992
synthesis of immunoglobulin by rheumatoid synovial membrane in patients with, 624
Rheumatoid synovium
studies on collagenase from, 2639
Ribonucleic acid (RNA)
characteristics of, synthesized in vitro by phytohemagglutinin stimulation of normal human small lymphocyte, 1083
synthesis of, in oviduct, 654
Rouleaux formation
reversible, shear rate dependence of red cell aggregation in vitro, 1447

S

Salicylates
effect of, on hemostatic properties of platelets, in man, 2169
Saline loading
influence of, on renal glucose reabsorption, in rat, 329
Sarcoplasmic reticulum
calcium transport by, in skeletal muscle of hypothyroid rat, 2499
Secretory γA
in normal urine, 1162
Secretory "piece"
in normal urine, 1162
Sedimentation rate
of red cell aggregation in vitro, 1447
Serum opsonin
interaction in subacute bacterial endocarditis, 1109
Sex distribution
binding globulins and, in human plasma, 2109
Shear rate dependence
of red cell aggregation in vitro, 1447
Sideroblastic anemia
hereditary, and G-6-PD deficiency in first Negro family, 1415
Skeletal muscle
sarcoplasmic reticulum, calcium transport by, in hypothyroid rat, 2499
Small intestine
absorption of L-methionine from the human, 417
mechanisms of sodium absorption in the human, 884
Sodium
absorption, mechanisms of, in the human small intestine, 884
depletion, stimulation of aldosterone biosynthesis by, in the dog, 1425
deprivation, response of aldosterone secretion to, 1742
diuresis, plasma volume and depression of fractional sodium reabsorption by proximal tubule of dog without, 1561
excretion, during expansion of extracellular volume with isotonic saline, 761
excretion, regulation of, in uremic man, 521
fractional reabsorption of, depression of, by proximal tubule of dog without sodium diuresis, 1561
reabsorption, by the proximal tubule, effect of acute hypertension on, 1696
reabsorption, demonstration of hormonal inhibitor of, during expansion of extracellular volume with isotonic saline, 761
reabsorption, relationship between glomerular filtration rate and, by proximal tubule of the rat nephron, 1359
reabsorption, renal, influence of saline loading on, in rat, 329
role of its concentration and glucose absorption in man, 1133
transport and aerobic respiration, effect of purified staphylococcal alpha toxin on, in isolated toad bladder, 1603
transport in renal proximal tubule, 2016

transport, mechanisms of, in the human small intestine, 884
Sodium bicarbonate
phosphaturic effect of, and acetazolamide, in dogs, 983
Sodium taurocholate
effect of, on bile flow and bile acid excretion, 1002
Solute transport
effect of antidiuretic hormone on, 1071
Sphingomyelin
turnover of, in red blood cell and plasma exchange in man and dog, 749
Spleen
activity of ferrochelatase in stimulated rat, as index of tissue erythropoiesis, 2230
Staphylococcal alpha toxin
purified effect of, on active sodium transport and aerobic respiration in isolated toad bladder, 1603
Steroid fever
studies on, 107
Stress
emotional, effects on plasma lipids and urinary catecholamines, 1795
Strophanthidin
effect of potassium transport in the human red blood cell in presence of, 946
Sucrose absorption
in jejunum, control of sucrase and maltase activity by, in man, 2253
Surfactant
acellular, importance of, in washings from normal dog lungs and after pulmonary artery ligation, 336
Synaptosome
effect of diphenylhydantoin on, sodium-potassium-ATPase, 2752
Synovial membrane
rheumatoid, synthesis of immunoglobulin, 624
Systemic lupus erythematosus
anti-DNA antibodies associated with, 1496

T

Target cells
pathogenesis of, in obstructive jaundice, 809
Tay-Sachs disease
erythrocyte composition in, 1858
Testosterone-binding globulins
in human plasma, 2109
Thalassemia
alpha, globin chain synthesis in, 2515
beta, hemoglobin synthesis in, 860
Theophylline
effect of, on calcium and phosphate metabolism, 1843
effect of prostaglandin E_1 on permeability response of the isolated collecting tubule to, 1154
Thiamine deficiency
effect on brain cerebral tissues, 2268
Thrombopoiesis
kinetics of, 458
Thyroid
glucose oxidation and phospholipid synthesis of, effects of long-acting, stimulator and thyroid-stimulating hormone, 1553
goiter formation and iodine depletion of, 1640
sensitivity to thyrotropin during iodine depletion, in rats, 1640
Thyrotoxicosis
plasma transport before and after treatment, 1349
thyroxine-binding globulin in, 1349
Thyrotropin
cross-reactivity with antibody to human follicle-stimulating hormone, 1722
effect of, on iodine depletion, in rats, 1640
Thyroxine
binding of, to prealbumin and other serum proteins, 1710
compartmental analysis of peripheral distribution of, in thyrotoxicosis and hypothyroidism, 2000
extrathyroidal, distribution in man, 26
hepatic uptake and deiodination rate of, in thyrotoxicosis and hypothyroidism, 2000
measurement of extrathyroidal distribution of, in man by four-compartmental model, 26
peripheral distribution of, in thyrotoxicosis and hypothyroidism, 2000
transport in serum of patients with thyrotoxic Graves' disease, before and after treatment, 1349
turnover of, effect of thyroid-suppressive doses of triiodothyronine on, and on free thyroxine fraction, 720
turnover of, increased, and thyroidal function after stimulation of hepatocellular binding of thyroxine by phenobarbital, 1375
uptake by liver and forearm in man, 26
Thyroxine binding
in liver, relation to thyroidal function, 1375
Tolbutamide
tolerance tests in prediabetic males, 729
Transferrin
measurement of rates of synthesis of, in control subjects and patients with gastrointestinal protein loss, 971
Transketolase
effect on brain cerebral tissues, 2268
Transplantation
human, erythrocytes in, 2206
human, heterophile antibodies in, 633
Transsulfuration
alterations in enzymes during development, study of methionine-activating enzyme, in mammals, 2099
Triglyceride
medium chain, intestinal absorption of, 612
synthesis, effects of diet on, in rat liver, 712
turnover of, in patients with nephrotic syndrome, 1685
Triiodothyronine
effect of thyroid-suppressive doses of, on thyroxine turnover and free thyroxine fraction, 720
Trioctanoin-1-^{14}C
intestinal absorption of, 612
Tryptophan metabolism
nature of circadian periodicity in, in man, 934
Tuberculin
transfer of hypersensitivity to, with dialysate of peripheral leukocytes, in man, 2152
Tubular absorption
distal, in renal hypertrophy, 774
proximal, in renal hypertrophy, 774
Tubular diameter
effect of, on fluid absorption in the renal proximal tubule, 2016
Tubular reabsorption
fractional, of sodium, depression of, by proximal tubule of dog without sodium diuresis, 1561
of bicarbonate, in patients with hereditary fructose intolerance, 1648
of phosphate, control of, in uremic man, 1865
of sodium, in uremic man, 521
of urobilinogen, in dog, 2117
proximal, demonstration of a hormonal inhibitor of, during expansion of extracellular volume with isotonic saline, 761
proximal, of sodium, effect of acute hypertension on, 1696

Tubular volume
effect of, on fluid absorption in the renal proximal tubule, 2016

U

Urea
human, antibacterial activity of, 2374
Urea transport
mechanisms of, in the human small intestine, 884
Uremia
characteristics of the control system governing sodium excretion in, in man, 521
control of phosphate excretion in, 1865
platelet factor 3 deficiency in normal subjects and patients with renal failure, 901
Uric acid
metabolism, suppression of glycine-^{15}N incorporation into urinary, by adenine-8-^{13}C in normal and gouty subjects, 1193
and purine metabolism of skin fibroblasts from patients with gout, 1511
turnover of, 1325
Urinary alkalinization
phosphaturic effect of sodium bicarbonate and acetazolamide during, in dogs, 983
Urinary bladder
antibacterial mechanisms of, 2689
Urinary concentration
impaired, after vasopressin, and correction in hypothalamic diabetes insipidus, 502
Urinary excretion
of parathyroid hormone, in man, 1583
Urinary infection
colicin action, transfer of colicinogeny, and transfer of antibiotic resistance in, 1763
Urinary proteins
quantitative immunological determination of, and effect of exercise on, 386
Urine
excretion of acidic mucopolysaccharides in exophthalmos, 2563
human, antibacterial activity of, 2374
secretory γA in normal, 1162
Urobilinogen
renal excretion of, in dog, 2117
Urokinase
effect of, antiserum on plasminogen activators: demonstration of immunologic dissimilarity between plasma plasminogen activator and urokinase, 1238

V

Vacuole formation
in patients with chronic granulomatous disease of childhood, 1753
Vascular permeability
effect of C'1 esterase on, in man, 604
Vascular resistance
differential reactivity in pulmonary circulation, 800
longitudinal distribution of, in pulmonary arteries, capillaries, and veins, 783
Vascular response
after alpha adrenergic receptor blockade, 1
venous and arterial segments' response to adrenergic stimulation in forelimb of dog, 10
Vasopressin
antidiuresis, norepinephrine inhibition of, 540
effect of, in hypothalamic diabetes insipidus, 502
effect of, on water and solute transport in the human small intestine, 1071
effect of prostaglandin E_1 on permeability response of the isolated collecting tubule to, 1154
Venous system
role of, in baroreceptor-mediated reflexes, in man, 139
Venous tone
reflex changes in, by baroreceptor stimulation, in man, 139
Ventilation and perfusion
pulmonary relationship and regional distribution of, in elderly subjects, 81
regional lung function in patients with bronchial asthma and relationship of, in, 1063
Ventilatory adjustment
to chronic metabolic alkalosis, in man, 188
Ventricular ejection time
duration of, effect of steady-state increases in systemic arterial pressure on, 217
Ventricular function
effects of anaerobic metabolism in, 403
in left ventricle of patients with chronic obstructive pulmonary disease, 1143
in right ventricle, measurement of volume from indicator washout curves, 848
Virus infection
ECHO-11, respiratory, quantitation of, in man, 1303
Vitamin A
retinol-binding protein: transport protein for, in human plasma, 2025
Vitamin B_{12}
absorption, effect of intrinsic factor on, 913
interaction of, with intrinsic factor in ileum, 913
Vitamin D_3
metabolism, in chronic renal disease, 2239
Volume expansion
influence of saline loading on renal glucose reabsorption during, 329
plasma, and depression of fractional sodium reabsorption by proximal tubule of dog without sodium diuresis, 1561
Volume receptors
changes in activity of, effect on ADH release, in man, 2143

W

Water transport
in human small intestine, effect of ADH hormone on, 1071
Wheal-and-flare reaction
specific, in man, initiated by antigen-antibody complexes, 556

X

Xanthine and hypoxanthine
levels of, in purine metabolism in a xanthinuric female, 1325
Xanthinuria
study of purine metabolism in a female with, 1325

CONTENTS

Number 1, January 1968

Vascular responses after alpha adrenergic receptor blockade. I. Responses of capacitance and resistance vessels to norepinephrine in man. *François M. Abboud, Phillip G. Schmid, and John W. Eckstein* 1

Vascular responses after alpha adrenergic receptor blockade. II. Responses of venous and arterial segments to adrenergic stimulation in the forelimb of dog. *François M. Abboud and John W. Eckstein* 10

Estradiol metabolism in cirrhosis. *Barnett Zumoff, Jack Fishman, T. F. Gallagher, and Leon Hellman* 20

Estimation of thyroxine distribution in man. *J. T. Nicoloff and J. Thomas Dowling* 26

Metabolic clearance and production rates of human luteinizing hormone in pre- and postmenopausal women. *Peter O. Kohler, Griff T. Ross, and William D. Odell* 38

Characterization of the responses of circulating glucagon-like immunoreactivity to intraduodenal and intravenous administration of glucose. *Roger H. Unger, Akira Ohneda, Isabel Valverde, A. M. Eisentraut, and John Exton* 48

Reduced nicotinamide adenine dinucleotide and the reduction of oxidized glutathione in human erythrocytes. *Egmond E. Rieber, Nechama S. Kosower, and Ernst R. Jaffé* 66

The phospholipid requirement of tissue factor in blood coagulation. *Yale Nemerson* 72

Regional distribution of pulmonary ventilation and perfusion in elderly subjects. *J. Holland, J. Milic-Emili, P. T. Macklem, and D. V. Bates* 81

Metabolic clearance rates and interconversions of estrone and 17β-estradiol in normal males and females. *Christopher Longcope, Donald S. Layne, and James F. Tait* 93

Studies on steroid fever I. Production of leukocyte pyrogen in vitro by etiocholanolone. *Phyllis Bodel and Morris Dillard* 107

The influence of the parathyroid glands on the hypercalcemia of experimental magnesium depletion in the rat. *H. J. Gitelman, S. Kukolj, and L. G. Welt* 118

Usefulness of chromic oxide as an internal standard for balance studies in formula-fed patients and for assessment of colonic function. *Jean Davignon, W. J. Simmonds, and E. H. Ahrens, Jr.* 127

Role of the venous system in baroreceptor-mediated reflexes in man. *Stephen E. Epstein, G. David Beiser, Morris Stampfer, and Eugene Braunwald* 139

The role of adipose cell size and adipose tissue insulin sensitivity in the carbohydrate intolerance of human obesity. *Lester B. Salans, Jerome L. Knittle, and Jules Hirsch* 153

Cholesterol synthesis in the squirrel monkey: relative rates of synthesis in various tissues and mechanisms of control. *John M. Dietschy and Jean D. Wilson* 166

Biosynthetic origin of serum cholesterol in the squirrel monkey: evidence for a contribution by the intestinal wall. *Jean D. Wilson* 175

Respiratory adjustment to chronic metabolic alkalosis in man. *Roberta M. Goldring, Paul J. Cannon, Henry O. Heinemann, and Alfred P. Fishman* 188

Micropuncture study of nephron function in the rhesus monkey. *Cleaves M. Bennett, Barry M. Brenner, and Robert W. Berliner* 203

The effect of steady-state increases in systemic arterial pressure on the duration of left ventricular ejection time. *James A. Shaver, Frank W. Kroetz, James J. Leonard, and H. W. Paley* 217

Number 2, February 1968

Turnover of plasma cholesterol in man. *DeWitt S. Goodman and Robert P. Noble* 231

The renal tubular handling of aldosterone and its acid-labile conjugate, *Murphy T. Scurry, Leroy Shear, and Kevin G. Barry* 242

Leukokinetic studies. XIII. A non–steady-state kinetic evaluation of the mechanism of cortisone-induced granulocytosis. *C. R. Bishop, J. W. Athens, D. R. Boggs, H. R. Warner, G. E. Cartwright, and M. M. Wintrobe* 249

Bile salt malabsorption in regional ileitis, ileal resection, and mannitol-induced diarrhea. *Walter E. Meihoff and Fred Kern, Jr.* 261
A pathological inhibitor of fibrin cross-linking. *L. Lorand, A. Jacobsen, and Joyce Bruner-Lorand* 268
Effects of alpha adrenergic blockade and tissue catecholamine depletion on pulmonary vascular response to hypoxia. *Eric D. Silove and Robert F. Grover* 274
The role of bile salts in controlling the rate of intestinal cholesterogenesis. *John M. Dietschy* 286
The nature of human serum insulin-like activity (ILA): characterization of ILA in serum and serum fractions obtained by acid-ethanol extraction and adsorption chromatography. *Philip L. Poffenbarger, John W. Ensinck, Dieter K. Hepp, and Robert H. Williams* 301
Study of the Hurler syndrome using cell culture: definition of the biochemical phenotype and the effect of ascorbic acid on the mutant cell. *Irwin A. Schafer, Julia C. Sullivan, Jiri Svejcar, Jorge Kofoed, and William Van B. Robertson* 321
The influence of saline loading on renal glucose reabsorption in the rat. *Alan M. Robson, Prem I. Srivastava, and Neal S. Bricker* 329
Surface tension, metabolic activity, and lipid composition of alveolar cells in washings from normal dog lungs and after pulmonary artery ligation. Importance of a highly surface-active acellular layer. *Sami I. Said, William R. Harlan, Jr., George W. Burke, and Charles M. Elliott* 336
Glycogen in human peripheral blood leukocytes. I. Characteristics of the synthesis and turnover of glycogen in vitro. *Robert B. Scott* 344
Glycogen in human peripheral blood leukocytes. II. The macromolecular state of leukocyte glycogen. *Robert B. Scott and W. J. S. Still* 353
Genetic variants of hemophilia B: detection by means of a specific PTC inhibitor. *Harold R. Roberts, James E. Grizzle, William D. McLester, and George D. Penick* 360
Alveolar cells: incorporation of carbohydrate into protein and evidence for intracellular protein transport. *Donald Massaro* 366
Control of myocardial oxygen consumption: relative influence of contractile state and tension development. *Thomas P. Graham, Jr., James W. Covell, Edmund H. Sonnenblick, John Ross, Jr., and Eugene Braunwald* 375
Quantitative immunological determination of 12 plasma proteins excreted in human urine collected before and after exercise. *Jacques Poortmans and Roger W. Jeanloz* 386
Fat-mobilizing action of amphetamine. *E. J. Pinter and C. J. Pattee* 394
Role of anaerobic metabolism in the preservation of functional capacity and structure of anoxic myocardium. *Arnold M. Weissler, Fred A. Kruger, Nobuhisa Baba, Dante G. Scarpelli, Richard F. Leighton, and Judith K. Gallimore* 403
Absorption of L-methionine from the human small intestine. *Harold P. Schedl, Charles E. Pierce, Alan Rider, and James A. Clifton* 417

NUMBER 3, MARCH 1968

Plasma growth hormone concentration in corticosteroid-treated children. *Helen G. Morris, Jacqueline R. Jorgensen, and Shirley A. Jenkins* 427
Metabolic effects of human growth hormone in corticosteroid-treated children. *Helen G. Morris, Jacqueline R. Jorgensen, Harold Elrick, and Richard E. Goldsmith* 436
Magakaryocyte quantitation. *Laurence A. Harker* 452
Kinetics of thrombopoiesis. *Laurence A. Harker* 458
The effect of platelet age on platelet adherence to collagen. *J. Hirsh, M. F. Glynn, and J. F. Mustard* 466
Immunological and biological properties of iodoinsulin labeled with one or less atoms of iodine per molecule. *Edward R. Arquilla, Henri Ooms, and Karen Mercola* 474
Effect of hemorrhage and retransfusion on intrarenal distribution of blood flow in dogs. *Knut Aukland and Mats Wolgast* 488
Impaired urinary concentration after vasopressin and its gradual correction in hypothalamic diabetes insipidus. *Avery R. Harrington and Heinz Valtin* 502
Mechanisms of reflex vasodilation: assessment of the role of neural reuptake of norepinephrine and release of histamine. *Gerald Glick, Andrew S. Wechsler, and Stephen E. Epstein* 511

Studies on the characteristics of the control system governing sodium excretion in uremic man. *Eduardo Slatopolsky, Ivan O. Elkan, Carol Weerts, and Neal S. Bricker* 521
Absorption of hemoglobin iron: the role of a heme-splitting substance in the intestinal mucosa. *Lewis R. Weintraub, Morton B. Weinstein, Hans-Jurg Huser, and Sheila Rafal* 531
Norepinephrine inhibition of vasopressin antidiuresis. *D. A. Fisher* 540
The effect of maternal oxygen inhalation upon fetal oxygenation. *Frederick C. Battaglia, Giacomo Meschia, Edgar L. Makowski, and Watson Bowes* 548
The nature of the antigen-antibody complexes initiating the specific wheal-and-flare reaction in sensitized man. *Bernard B. Levine and Anthony P. Redmond* 556
Metabolism of α-methyltyrosine in man: relationship to its potency as an inhibitor of catecholamine biosynthesis. *Karl Engelman, Eric Jéquier, Sidney Udenfriend, and Albert Sjoerdsma* 568
Biochemical and pharmacologic effects of α-methyltyrosine in man. *Karl Engelman, David Horwitz, Eric Jéquier, and Albert Sjoerdsma* 577
Sterol synthesis in the human arterial intima. *Aram V. Chobanian* 595
Effect of C'1 esterase on vascular permeability in man: studies in normal and complement-deficient individuals and in patients with hereditary angioneurotic edema. *Martin R. Klemperer, Virginia H. Donaldson, and Fred S. Rosen* 604
Rate-limiting steps in steady-state intestinal absorption of trioctanoin-1-^{14}C. Effect of biliary and pancreatic flow diversion. *Susanne Bennett Clark and Peter R. Holt* 612
In vitro synthesis of immunoglobulin by rheumatoid synovial membrane. *J. Donald Smiley, Charlotte Sachs, and Morris Ziff* 624
Heterophile antibodies in human transplantation. *F. T. Rapaport, K. Kano, and F. Milgrom* 633
Studies on manganese. III. The biological half-life of radiomanganese in man and factors which affect this half-life. *John P. Mahoney and Walter J. Small* 643
Studies on the mechanism of action of progesterone in regulation of the synthesis of specific protein. *Bert W. O'Malley and William L. McGuire* 654
Measurement of human luteinizing hormone in plasma by radioimmunoassay. *Don S. Schalch, Albert F. Parlow, Robert C. Boon, and Seymour Reichlin* 665
Disproportional synthesis of the adult duck's two hemoglobins during acute anemia. *John F. Bertles and Thomas A. Borgese* 679

NUMBER 4, APRIL 1968

Chronic hemolytic anemia due to cold agglutinins. II. The role of C' in red cell destruction. *Robert S. Evans, Elizabeth Turner, Margaret Bingham, and Richard Woods* 691
Observations on the mechanisms of glucosuria during glucose loads in normal and nondiabetic subjects. *John J. McPhaul, Jr. and John J. Simonaitis* 702
Effects of diet on hepatic triglyceride synthesis. *Harold J. Fallon and E. Leon Kemp* 712
Effect of thyroid-suppressive doses of triiodothyronine on thyroxine turnover and on the free thyroxine fraction. *George C. Schussler and Vernon K. Vance* 720
Elevated serum human growth hormone and decreased serum insulin in prediabetic males after intravenous tolbutamide and glucose. *G. Boden, J. S. Soeldner, R. E. Gleason, and A. Marble* 729
An extrarenal mechanism of potassium adaptation. *Edward A. Alexander and Norman G. Levinsky* 740
Phospholipid exchange between plasma and erythrocytes in man and the dog. *Claude F. Reed* 749
Demonstration of a hormonal inhibitor of proximal tubular reabsorption during expansion of extracellular volume with isotonic saline. *Floyd C. Rector, Jr., Manuel Martinez-Maldonado, Neil A. Kurtzman, Jack C. Sellman, Fred Oerther, and Donald W. Seldin* 761
Functional correlates of compensatory renal hypertrophy. *John P. Hayslett, Michael Kashgarian, and Franklin H. Epstein* 774
Longitudinal distribution of vascular resistance in the pulmonary arteries, capillaries, and veins. *Jerome S. Brody, Edward J. Stemmler, and Arthur B. DuBois* 783
Differential reactivity in the pulmonary circulation. *Jerome S. Brody and Edward J. Stemmler* 800
Bile salts and cholesterol in the pathogenesis of target cells in obstructive jaundice. *Richard A. Cooper and James H. Jandl* 809

Renal tubular transport of proline, hydroxyproline, and glycine. III. Genetic basis for more than one mode of transport in human kidney. *Charles R. Scriver* 823
Studies on the in vitro behavior of agammaglobulinemic lymphocytes. *S. R. Cooperband, F. S. Rosen, and S. Kibrick* 836
Mixing in the right ventricle and pulmonary artery in man: evaluation of ventricular volume measurements from indicator washout curves. *Attilio Maseri and Yale Enson* 848
Hemoglobin synthesis in β-thalassemia: the properties of the free α-chains. *Arthur Bank* 860
Myocardial mechanics in aortic and mitral valvular regurgitation: the concept of instantaneous impedance as a determinant of the performance of the intact heart. *Charles W. Urschel, James W. Covell, Edmund H. Sonnenblick, John Ross, Jr., and Eugene Braunwald* 867
The mechanisms of sodium absorption in the human small intestine. *John S. Fordtran, Floyd C. Rector, Jr., and Norman W. Carter* 884
Platelet factor 3 in normal subjects and patients with renal failure. *S. Frederick Rabiner and Otto Hrodek* 901
Identification of a macromolecular factor in the ileum which binds intrinsic factor and immunologic identification of intrinsic factor in ileal extracts. *Sheldon P. Rothenberg* 913
The characterization of soluble amyloid prepared in water. *M. Pras, M. Schubert, D. Zucker-Franklin, A. Rimon, and E. C. Franklin* 924
Circadian periodicity of tryptophan metabolism. *Morton I. Rapoport and William R. Beisel* 934
In vivo lability of glucose-6-phosphate dehydrogenase in Gd^{A-} and $Gd^{Mediterranean}$ deficiency. *Sergio Piomelli, Laurence M. Corash, Deatra D. Davenport, Janet Miraglia, and Edward L. Amorosi* 940
Concentration dependence of active potassium transport in the human red blood cell in the presence of inhibitors. *John R. Sachs and Louis G. Welt* 949
A comparison of the effects of vasodilator stimuli on peripheral resistance vessels in normal subjects and in patients with congestive heart failure. *Robert Zelis, Dean T. Mason, and Eugene Braunwald* 960

NUMBER 5, MAY 1968

Direct measurement of the rates of synthesis of plasma proteins in control subjects and patients with gastrointestinal protein loss. *R. Dean Wochner, Sherman M. Weissman, Thomas A. Waldmann, Delores Houston, and Nathaniel I. Berlin* 971
The phosphaturic effect of sodium bicarbonate and acetazolamide in dogs. *Milford Fulop and Paul Brazeau* 983
Slow turnover of manganese in active rheumatoid arthritis accelerated by prednisone. *George C. Cotzias, Paul S. Papavasiliou, Edwin R. Hughes, Lily Tang, and Donald C. Borg* 992
Effect of sodium taurolithocholate on bile flow and bile acid excretion. *Norman B. Javitt and Sidney Emerman* 1002
Absorption of oleic and palmitic acids from emulsions and micellar solutions. *W. J. Simmonds, T. G. Redgrave, and R. L. S. Willix* 1015
The pattern of genetic transmission of the leukocyte defect in fatal granulomatous disease of childhood. *D. B. Windhorst, A. R. Page, B. Holmes, P. G. Quie, and R. A. Good* 1026
The measurement of digitoxin in human serum by radioimmunoassay. *George C. Oliver, Jr., Brent M. Parker, Daniel L. Brasfield, and Charles W. Parker* 1035
The physicochemical basis of cholesterol gallstone formation in man. *William H. Admirand and Donald M. Small* 1043
Antibodies of the IgG, IgM, and IgA classes in newborn and adult sera reactive with gram-negative bacteria. *Irun R. Cohen and Leslie C. Norins* 1053
Regional lung function in patients with bronchial asthma. *T. Heckscher, H. Bass, A. Oriol, B. Rose, N. R. Anthonisen, and D. V. Bates* 1063
Effect of antidiuretic hormone on human small intestinal water and solute transport. *Konrad H. Soergel, George E. Whalen, John A. Harris, and Joseph E. Geenen* 1071
Characteristics of the RNA synthesized in vitro by the normal human small lymphocyte and the changes induced by phytohemagglutinin stimulation. *Umberto L. Torelli, Patrick H. Henry, and Sherman M. Weissman* 1083

Stages in the incorporation of fatty acids into red blood cells. *Stephen B. Shohet, David G. Nathan, and Manfred L. Karnovsky* 1096
Serum opsonin, bacteria, and polymorphonuclear leukocyte interactions in subacute bacterial endocarditis. Anti-γ-globulin factors and their interaction with specific opsonins. *Ronald P. Messner, Throstur Laxdal, Paul G. Quie, and Ralph C. Williams, Jr.* 1109
Partition of calcium, phosphate, and protein in the fluid phase aspirated at calcifying sites in epiphyseal cartilage. *David S. Howell, Julio C. Pita, Juan F. Marquez, and Juan E. Madruga* 1121
The role of sodium in intestinal glucose absorption in man. *Ward A. Olsen and Franz J. Ingelfinger* 1133
Left ventricular function in patients with chronic obstructive pulmonary disease. *John F. Williams, Jr., Richard H. Childress, Daniel L. Boyd, Lawrence M. Higgs, and Roy H. Behnke* 1143
Effect of prostaglandin E_1 on the permeability response of the isolated collecting tubule to vasopressin, adenosine 3',5'-monophosphate, and theophylline. *Jared J. Grantham and Jack Orloff* 1154
Secretory γ*A* in normal urine. *John Bienenstock and Thomas B. Tomasi, Jr.* 1162
Inhibition of Hageman factor activation. *H. L. Nossel, H. Rubin, M. Drillings, and R. Hsieh* 1172
Correction of metabolic alkalosis by the kidney after isometric expansion of extracellular fluid. *Jordan J. Cohen* 1181
Suppression of glycine-^{15}N incorporation into urinary uric acid by adenine-8-^{13}C in normal and gouty subjects. *J. Edwin Seegmiller, James R. Klinenberg, John Miller, and R. W. E. Watts* 1193
On the mechanisms of maternofetal transfer of human albumin and γG globulin in the mouse. *David Gitlan and Christian Koch* 1204
Site and characteristics of electrolyte loss and effect of intraluminal glucose in experimental canine cholera. *Charles C. J. Carpenter, R. Bradley Sack, John C. Feeley, and Richard W. Steenberg* 1210
Arterial wall metabolism in experimental hypertension of coarctation of the aorta of short duration. *William Hollander, Dieter M. Kramsch, Melvin Farmelant, and Irving M. Madoff* 1221

Number 6, June 1968

Effect of blood flow reversal in liver autotransplants upon the site of hepatocyte regeneration. *Bernard Sigel, Liveo B. Baldia, Signe A. Brightman, Marvin R. Dunn, and Raphael I. M. Price* 1231
Effect of urokinase antiserum on plasminogen activators: demonstration of immunologic dissimilarity between plasma plasminogen activator and urokinase. *Chester S. Kucinski, Anthony P. Fletcher, and Sol Sherry* 1238
Genetic studies in primary gout. Investigations on the plasma levels of the urate-binding α_1-α_2-globulin in individuals from two gouty kindreds. *J. O. Alvsaker* 1254
The relationship between endogenous serum insulin concentration and glucose uptake in the forearm muscles of nondiabetics. *Niels Juel Christensen and Hans Ørskov* 1262
Auditory detection and perception in normal man and in patients with adrenal cortical insufficiency: effect of adrenal cortical steroids. *Robert I. Henkin and Robert L. Daly* 1269
The nonerythropoietic component of early bilirubin. *M. Levitt, B. A. Schacter, A. Zipursky, and L. G. Israels* 1281
Kinins: possible mediators of neonatal circulatory changes in man. *Kenneth L. Melmon, Martin J. Cline, Trevor Hughes, and Alan S. Nies* 1295
ECHO-11 as a respiratory virus: quantitation of infection in man. *Gilbert S. Saliba, Sylvia L. Franklin, and George Gee Jackson* 1303
Bile salt and micellar fat concentration in proximal small bowel contents of ileectomy patients. *B. W. Van Deest, J. S. Fordtran, S. G. Morawski, and J. D. Wilson* 1314
Study of purine metabolism in a xanthinuric female. *Michael J. Bradford, Irwin H. Krakoff, Robert Leeper, and M. Earl Balis* 1325
Left ventricular function in experimental aorto-caval fistula with circulatory congestion and fluid retention. *Roger R. Taylor, James W. Covell, and John Ross, Jr.* 1333
Glucose and glycogen metabolism in erythrocytes from normal and glycogen storage disease type III subjects. *Shimon W. Moses, Reuben Chayoth, Stanley Levin, Ela Lazarovitz, and David Rubinstein* 1343
Thyroid hormone transport in the serum of patients with thryrotoxic Graves' disease before and after treatment. *Lewis E. Braverman, Angela E. Foster, and Sidney H. Ingbar* 1349

The relationship between glomerular filtration rate and sodium reabsorption by the proximal tubule of the rat nephron. *Barry M. Brenner, Cleaves M. Bennett, and Robert W. Berliner* 1358
Hereditary nonspherocytic hemolytic disease associated with an altered phospholipid composition of the erythrocytes. *Ernst R. Jaffé and Eugene L. Gottfried* 1375
An experimental renal acidification defect in patients with hereditary fructose intolerance. I. Its resemblance to renal tubular acidosis. *R. Curtis Morris, Jr.* 1389
Increased thyroxine turnover and thyroidal function after stimulation of hepatocellular binding of thyroxine by phenobarbital. *Jack H. Oppenheimer, Gerald Bernstein, and Martin I. Surks* 1399
Adrenergic receptor control mechanism for growth hormone secretion. *William G. Blackard and Sylvia A. Heidingsfelder* 1407
Hereditary sideroblastic anemia and glucose-6-phosphate dehydrogenase deficiency in a Negro family. *Ananda S. Prasad, Liborio Tranchida, Edward T. Konno, Lawrence Berman, Samuel Albert, Charles F. Sing, and George J. Brewer* 1415
Sites of action of sodium depletion on aldosterone biosynthesis in the dog. *Warren W. Davis, Lawrence R. Burwell, Alfred G. T. Casper, and Frederic C. Bartter* 1425
Maximal erythrocyte and hemoglobin catabolism. *Ronald F. Coburn and Peter B. Kane* 1435
On the shear rate dependence of red cell aggregation in vitro. *H. Schmid-Schönbein, P. Gaehtgens, and H. Hirsch* 1447
Frequency dependence of flow resistance in patients with obstructive lung disease. *Gunnar Grimby, Tamotsu Takishima, William Graham, Peter Macklem, and Jere Mead* 1455
Proceedings of the Sixtieth Annual Meeting of the American Society for Clinical Investigation, Inc., held in Atlantic City, N. J., 6 May 1968 1466

Number 7, July 1968

Studies on the partition of iron in bone marrow cells. *Joseph V. Primosigh and E. Donnall Thomas* 1473
Hemoglobin CC disease: rheological properties of erythrocytes and abnormalities in cell water. *John R. Murphy* 1483
In vitro effect of antibodies to DNA on the template activity of DNA. *John N. Whitaker and Jason L. Starr* 1496
Variations in purine metabolism of cultured skin fibroblasts from patients with gout. *J. Frank Henderson, Frederick M. Rosenbloom, William N. Kelley, and J. Edwin Seegmiller* 1511
Effect of dietary fat on the fecal excretion of cholesterol and its degradation products in man. *Richard B. Moore, Joseph T. Anderson, Henry L. Taylor, Ancel Keys, and Ivan D. Frantz, Jr.* 1517
Rate of disappearance of labeled carbon dioxide from the lungs of humans during breath holding: a method for studying the dynamics of pulmonary CO_2 exchange. *Richard W. Hyde, Ricardo J. M. Puy, William F. Raub, and Robert E. Forster* 1535
In vitro stimulation by long-acting thyroid stimulator of thyroid glucose oxidation and ^{32}P incorporation into phospholipids. *James B. Field, Adrienne Remer, Gail Bloom, and Joseph P. Kriss* 1553
Depression of fractional sodium reabsorption by the proximal tubule of the dog without sodium diuresis. *Stuart S. Howards, Bernard B. Davis, Franklyn G. Knox, Fred S. Wright, and Robert W. Berliner* 1561
Formation of bile acids in man: conversion of cholesterol into 5β-cholestane-3α,7α, 12α-triol in liver homogenates. *Ingemar Björkhem, Henry Danielsson, Kurt Einarsson, and Gunnar Johansson* 1573
A study of urinary excretion of parathyroid hormone in man. *John E. Bethune and Randolph A. Turpin* 1583
The incorporation of acetate and palmitate into lipids by human platelets. *Daniel Deykin and Richard K. Desser* 1590
Effect of purified staphylococcal alpha toxin on active sodium transport and aerobic respiration in the isolated toad bladder. *James J. Rahal, Jr., Martin E. Plaut, and Louis Weinstein* 1603
An index of the contractile state of the myocardium in man. *Martin J. Frank and Gilbert E. Levinson.* 1615
The red cell mass—arterial oxygen relationship in normal man. Application to patients with chronic obstructive airway disease. *John V. Weil, Gail Jamieson, Donald W. Brown, and Robert F. Grover.* . 1627
Increased sensitivity of the thyroid in iodine-depleted rats to the goitrogenic effects of thyrotropin. *George A. Bray* 1640

An experimental renal acidification defect in patients with hereditary fructose intolerance. II. Its distinction from classic renal tubular acidosis; its resemblance to the renal acidification defect associated with the Fanconi syndrome of children with cystinosis. *R. Curtis Morris, Jr.* 1648
Effect of cholestyramine on the fecal excretion of intravenously administered cholesterol-4-^{14}C and its degradation products in a hypercholesterolemic patient. *Richard B. Moore, Catherine A. Crane, and Ivan D. Frantz, Jr.* 1664
Effect of norepinephrine, epinephrine, and angiotensin on blood flow in the internal carotid artery of man. *Joseph C. Greenfield, Jr., and George T. Tindall* 1672
Studies on the turnover of triglyceride and esterified cholesterol in subjects with the nephrotic syndrome. *I. F. C. McKenzie and P. J. Nestel* 1685
Effect of acute hypertension on sodium reabsorption by the proximal tubule. *Karl M. Koch, Hagop S. Aynedjian, and Norman Bank* 1696
The contribution of thyroxine-binding prealbumin to the binding of thyroxine in human serum, as assessed by immunoadsorption. *Kenneth A. Woeber and Sidney H. Ingbar* 1710
Antibody to human follicle-stimulating hormone: cross-reactivity with three other hormones. *Sheldon Schlaff, Saul W. Rosen, and Jesse Roth* 1722

Number 8, August 1968

Irreversibly sickled erythrocytes: a consequence of the heterogeneous distribution of hemoglobin types in sickle-cell anemia. *John F. Bertles and Paul F. A. Milner* 1731
Aldosterone hypersecretion in "non-salt-losing" congenital adrenal hyperplasia. *Frederic C. Bartter, Robert I, Henkin, and George T. Bryan* 1742
Leukocyte degranulation and vacuole formation in patients with chronic granulomatous disease of childhood. *Emanuel Kauder, Louis L. Kahle, Hernan Moreno, and John C. Partin* 1753
The influence of bacteriocins on resistance to infection by Gram-negative bacteria. II. Colicin action, transfer of colicinogeny, and transfer of antibiotic resistance in urinary infections. *Abraham I. Braude and J. S. Siemienski* 1763
Hemodynamic effects after conversion of arrhythmias. *Robert J. Corliss, David H. McKenna, Charles W. Crumpton, and George G. Rowe* 1774
Defective lipid metabolism in the failing heart. *Benjamin Wittels and James F. Spann, Jr.* 1787
Plasma lipids and urinary excretion of catecholamines in man during experimentally induced emotional stress, and their modification by nicotinic acid. *Lars A. Carlson, Lennart Levi, and Lars Orö* 1795
Effect of neomycin on exchangeable pools of cholesterol in the steady state. *Paul Samuel, Charles M. Holtzman, Edward Meilman, and William Perl* 1806
Malabsorption of hemoglobin iron in pernicious anemia: correction with intrinsic factor–containing substances. *Samuel Waxman, Peter Pratt, and Victor Herbert* 1819
Enzymes of fructose metabolism in human liver. *Fritz Heinz, Walther Lamprecht, and Joachim Kirsch* 1826
Enzymic properties of different types of human erythrocyte glucose-6-phosphate dehydrogenase, with characterization of two new genetic variants. *L. Luzzatto and A. Afolayan* 1833
Effect of dibutyryl cyclic adenosine 3′,5′-monophosphate, theophylline, and other nucleotides upon calcium and phosphate metabolism. *Howard Rasmussen, Maurice Pechet, and Danuta Fast* 1843
Improved oxygen release: an adaptation of mature red cells to hypoxia. *Miles J. Edwards, Miles J. Novy, Carrie-Lou Walters, and James Metcalfe* 1851
Studies of red cell stromal proteins in Tay-Sachs disease. *John A. Balint and Emilios C. Kyriakides* 1858
Control of phosphate excretion in uremic man. *E. Slatopolsky, A. M. Robson, I. Elkan, and N. S. Bricker* 1865
Human monoclonol γG-cryoglobulins with anti–γ-globulin activity. *Howard M. Grey, Peter F. Kohler, William D. Terry, and Edward C. Franklin* 1875
Effect of acute hypoxia and hypercapnic acidosis on the development of acetylstrophanthidin-induced arrhythmias. *John F. Williams, Jr., Daniel L. Boyd, and John F. Border* 1885
Erythropoietic kinetics in sheep studied by means of induced changes in hemoglobin phenotype. *Thomas G. Gabuzda, Marc A. Schuman, Ruth K. Silver, and Hugh B. Lewis* 1895

Immunoglobulin metabolism in ataxia telangiectasia. *Warren Strober, R. Dean Wochner, Mahlon H. Barlow, Dale E. McFarlin, and Thomas A. Waldmann* 1905
Factors that limit brain volume changes in response to acute and sustained hyper- and hyponatremia. *Malcolm A. Holliday, M. N. Kalayci, and Jean Harrah* 1916
An inherited molecular lesion of erythrocyte pyruvate kinase. Identification of a kinetically aberrant isozyme associated with premature hemolysis. *Donald E. Paglia, William N. Valentine, Marjorie A. Baughan, Denis R. Miller, Claude F. Reed, and O. Ross McIntyre* 1929

Number 9, September 1968

Insulin delivery rate into plasma in normal and diabetic subjects. *Michael P. Stern, John W. Farquhar, Abraham Silvers, and Gerald M. Reaven* 1947
Albumin metabolism: effect of the nutritional state and the dietary protein intake. *W. P. J. James and A. M. Hay* 1958
Studies of muscle capillary basement membranes in normal subjects, diabetic, and prediabetic patients. *M. D. Siperstein, R. H. Unger, and L. L. Madison* 1973
Studies of peripheral thyroxine distribution in thyrotoxicosis and hypothyroidism. *John T. Nicoloff and J. Thomas Dowling* 2000
Control of fluid absorption in the renal proximal tubule. *Maurice B. Burg and Jack Orloff* 2016
Retinol-binding protein: the transport protein for vitamin A in human plasma. *Masamitsu Kanai, Amiram Raz, and DeWitt S. Goodman* 2025
Evaluation of the forced oscillation technique for the determination of resistance to breathing. *Aron B. Fisher, Arthur B. DuBois, and Richard W. Hyde* 2045
Iron metabolism in copper-deficient swine. *G. Richard Lee, Sergio Nacht, John N. Lukens, and G. E. Cartwright* 2058
Absorption of bile acids from the large bowel in man. *Paul Samuel, George M. Saypol, Edward Meilman, Erwin H. Mosbach, and Mohsen Chafizadeh* 2070
Growth hormone secretion during sleep. *Y. Takahashi, D. M. Kipnis, and W. H. Daughaday* 2079
Effect of early nutrition on the development of rat epididymal fat pads: cellularity and metabolism. *Jerome L. Knittle and Jules Hirsch* 2091
Transsulfuration in mammals: fetal and early development of methionine-activating enzyme and its relation to hormonal influences. *H. Peter Chase, Joseph J. Volpe, and Leonard Lasteir* 2099
Testosterone-binding globulins in human plasma: studies on sex distribution and specficity. *William Rosner and Susan M. Deakins* 2109
Renal excretion of urobilinogen in the dog. *Mortimer Levy, Roger Lester, and Norman G. Levinsky* 2117
Regional distribution of acid mucopolysaccharides in the kidney. *C. W. Castor and J. A. Greene* 2125
Brain metabolism in uremic and adenosine-infused rats. *Stanley van den Noort, Robert E. Eckel, Katherine Brine, and Jeffry T. Hrdlicka* 2133
The regulation of antidiuretic hormone release in man. I. Effects of change in position and ambient temperature on blood ADH levels. *William E. Segar and Ward W. Moore* 2143
Attempt to transfer contact hypersensitivity in man with dialysate of peripheral leukocytes. *Michael W. Brandriss* 2152
Biochemical energetics of simulated platelet plug formation. Effect of thrombin, adenosine diphosphate, and epinephrine on intra- and extracellular adenine nucleotide kinetics. *Simon Karpatkin and Richard M. Langer* 2158
The effect of salicylates on the hemostatic properties of platelets in man. *Harvey J. Weiss, Louis M. Aledort, and Shaul Kochwa* 2169
Genetic polymorphism of the third component of human complement (C'3). *Chester A. Alper and Richard P. Propp* 2181

Number 10, October 1968

Hemodynamic effects of isoproterenol in canine endotoxin shock. *Boleslaw Starzecki and Wesley W. Spink* 2193
Erythrocytes in human transplantation: effects of pretreatment with ABO group-specific antigens. *F. T. Rapaport, J. Dausset, L. Legrand, A. Barge, H. S. Lawrence, and J. M. Converse* 2206

Increased synthesis of phospholipid during phagocytosis. *Peter Elsbach* 2217
Metabolism of the stimulated rat spleen. I. Ferrochelatase activity as an index of tissue erythropoiesis. *Abraham Mazur* 2230
The metabolic fate of vitamin D_3-^3H in chronic renal failure. *Louis V. Avioli, Stanley Birge, Sook Won Lee, and Eduardo Slatopolsky* 2239
Control of jejunal sucrase and maltase activity by dietary sucrose or fructose in man. A model for the study of enzyme regulation in man. *Norton S. Rosensweig and Robert H. Herman* 2253
Red cell life span after splenectomy in hereditary spherocytosis. *Robert G. Chapman* 2263
Encephalopathy of thiamine deficiency: studies of intracerebral mechanisms. *David W. McCandless and Steven Schenker* 2268
Adenine phosphoribosyltransferase deficiency: a previously undescribed genetic defect in man. *William N. Kelley, Robert I. Levy, Frederick M. Rosenbloom, J. Frank Henderson, and J. Edwin Seegmiller* 2281
Immunogenetics of human haptoglobins. I. The antigenic structure of normal Hp phenotypes. *Jamshid Javid and Wendy Yingling* 2290
Immunogenetics of human haptoglobins. II. Hp Bellevue, a cross-reacting mutant. *Jamshid Javid and Wendy Yingling* 2297
Characterization of response of circulating glucagon to intraduodenal and intravenous administration of amino acids. *Akira Ohneda, Eugenio Parada, Anna M. Eisentraut, and Roger H. Unger* 2305
Catabolism of human γG-immunoglobulins of different heavy chain subclasses. I. Catabolism of γG-myeloma proteins in man. *Hans L. Spiegelberg, Ben G. Fishkin, and Howard M. Grey* 2323
Effects of guanidine derivatives on mitochondrial function. I. Phenethylbiguanide inhibition of respiration in mitochondria from guinea pig and rat tissues. *Frank Davidoff* 2331
Effects of guanidine derivatives on mitochondrial function. II. Reversal of guanidine-derivative inhibition by free fatty acids. *Frank Davidoff* 2344
Catecholamine turnover in normotensive and hypertensive man: effects of antiadrenergic drugs. *Vincent DeQuattro and Albert Sjoerdsma* 2359
Antibacterial activity of human urine. *Donald Kaye* 2374
Infectious mononucleosis: immunoglobulin synthesis by cell lines. *Philip R. Glade and Lawrence N. Chessin* 2391
The determination of total body exchangeable O_2 stores. *Carroll D. Cross, Bernard S. Packer, Michael Altman, J. Bernard L. Gee, H. Victor Murdaugh, Jr., and Eugene D. Robin* 2402
Pressure-flow studies in man during atrial fibrillation. *Joseph C. Greenfield, Jr., Alexander Harley, Howard K. Thompson, and Andrew G. Wallace* 2411

Number 11, November 1968

The metabolism of orally and intravenously administered labeled aldosterone in pregnant subjects. *J. F. Tait and B. Little* 2423
Fixation of the first component of complement (C'1a) by human antibodies. *Wendell F. Rosse* 2430
A comparison of heritable abnormal lipoprotein patterns as defined by two different techniques. *D. S. Fredrickson, R. I. Levy, and F. T. Lindgren* 2446
Metabolism of adenosine 3',5'-monophosphate by epithelial cells of the toad bladder. *Paul F. Gulyassy* 2458
In vivo metabolism of complement. I. Metabolism of the third component (C'3) in acquired hemolytic anemia. *Lawrence D. Petz, Diane J. Fink, Elizabeth A. Letsky, H. Hugh Fudenberg, and Hans J. Müller-Eberhard* 2469
Regulation of DNA synthesis in fat cells and stromal elements from rat adipose tissue. *C. H. Hollenberg and A. Vost* 2485
Calcium transport by skeletal muscle sarcoplasmic reticulum in the hypothyroid rat. *Barry L. Fanburg* 2499
Renal accumulation of salicylate and phenacetin: possible mechanisms in the nephropathy of analgesic abuse. *Lewis W. Bluemle, Jr. and Martin Goldberg* 2507
Globin chain synthesis in the alpha thalassemia syndromes. *Yuet Wai Kan, Elias Schwartz, and David G. Nathan* 2515
Metabolism and rate of secretion of aldosterone in the bullfrog. *Stanley Ulick and Erica Feinholtz* 2523
Studies on human platelet protease activity. *Ralph L. Nachman and Barbara Ferris* 2530

Local immune response in experimental pyelonephritis. *James D. Lehmann, James W. Smith, Thomas E. Miller, Jack A. Barnett, and Jay P. Sanford* 2541

Number 12, December 1968

Radioimmunoassay for human follicle—stimulating hormone: physiological studies. *W. D. Odell, A. F. Parlow, C. M. Cargille, and G. T. Ross* 2551
Increased urinary excretion of acidic mucopolysaccharides in exophthalmos. *Roger J. Winand* 2563
Effect of removal of bullae on airway conductance and conductance volume ratios. *Robert M. Rogers, Arthur B. DuBois, and William S. Blakemore* 2569
Metabolic and calcium kinetic studies in idiopathic hypercalciuria. *U. A. Liberman, O. Sperling, A. Atsmon, M. Frank, M. Modan, and A. de Vries* 2580
Effects of a short-term fast on albumin synthesis studied in vivo, in the perfused liver, and on amino acid incorporation by hepatic microsomes. *Marcus A. Rothschild, Murray Oratz, Joseph Mongelli, and Sidney S. Schreiber* 2591
Response of the canine duodenum to intraluminal challenge with cholera exotoxin. *Charles C. J. Carpenter and William B. Greenough III* 2600
Activation of Hageman factor by collagen. *G. D. Wilner, H. L. Nossel, and E. C. LeRoy* 2608
Aggregation of platelets by collagen. *G. D. Wilner, H. L. Nossel, and E. C. LeRoy* 2616
Degradation of collagen by a human granulocyte collagenolytic system. *Gerald S. Lazarus, John R. Daniels, Robert S. Brown, Howard A. Bladen, and Harold M. Fullmer* 2622
Incorporation of orthophosphate-^{32}P into erythrocyte phospholipids in normal subjects and in patients with hereditary spherocytosis. *Claude F. Reed* 2630
Studies on collagenase from rheumatoid synovium in tissue culture. *John M. Evanson and Stephen M. Krane* 2639
Effect of altitude on oxygen binding by hemoglobin and on organic phosphate levels. *Claude Lenfant, John Torrance, Eugenia English, Clement A. Finch, Cesar Reynafarje, Jose Ramos, and Jose Faura* 2652
Genetic control of dicumarol levels in man. *Elliot S. Vesell and John G. Page* 2657
Altered sulfhydryl reactivity of hemoglobins and red blood cell membranes in congenital Heinz body hemolytic anemia. *Harry S. Jacob, Michael C. Brain, and John V. Dacie* 2664
Nonsuppressible insulin-like activity in human serum. III. Differentiation of two distinct molecules with nonsuppressible ILA. *A. Jakob, Ch. Hauri, and E. R. Froesch* 2678
Antibacterial mechanisms of the urinary bladder. *Carl W. Norden, Gareth M. Green, and Edward H. Kass* 2689
Toxic effects of glucagon-induced acute lipid mobilization in geese. *John C. Hoak, William E. Connor, and Emory D. Warner* 2701
Effects of heterogeneous myocardial perfusion on coronary venous H_2 desaturation curves and calculations of coronary flow. *Francis J. Klocke, Robert C. Koberstein, David E. Pittman, Ivan L. Bunnell, David G. Greene, and Douglas R. Rosing* 2711
Radioimmunoassay of ACTH in plasma. *Solomon A. Berson and Rosalyn S. Yalow* 2725
Effect of diphenylhydantoin on synaptosome sodium-potassium-ATPase. *Barry W. Festoff and Stanley H. Appel* 2752
